Introduction

A simple contact form created by JSN UniForm

JSN UniForm is a Joomla form extension which helps you create forms quickly and easily - from normal forms to complex forms. Moreover, you can easily manage all the submissions as the administrator. The configured form can be published in any part of website including: in article content, in the mainbody area and in different module positions. Here is the demo of [JSN UniForm extension](#). You can print this document for convenient reading.

Let's roll!

Hot features overview

Joomla 3.x compatibility

JSN UniForm is natively compatible with Joomla 3.x

JSN UniForm PRO STANDARD

☐ JSN UniForm PRO STANDARD for Joomla! 3.x (installation package)
This is standard installation file of JSN UniForm PRO STANDARD for Joomla! 3.x. You can install this file as regular Joomla! extensions.
Version: 3.2.6 Date: 27 August 2015 Size: 1.35MB [Download](#)

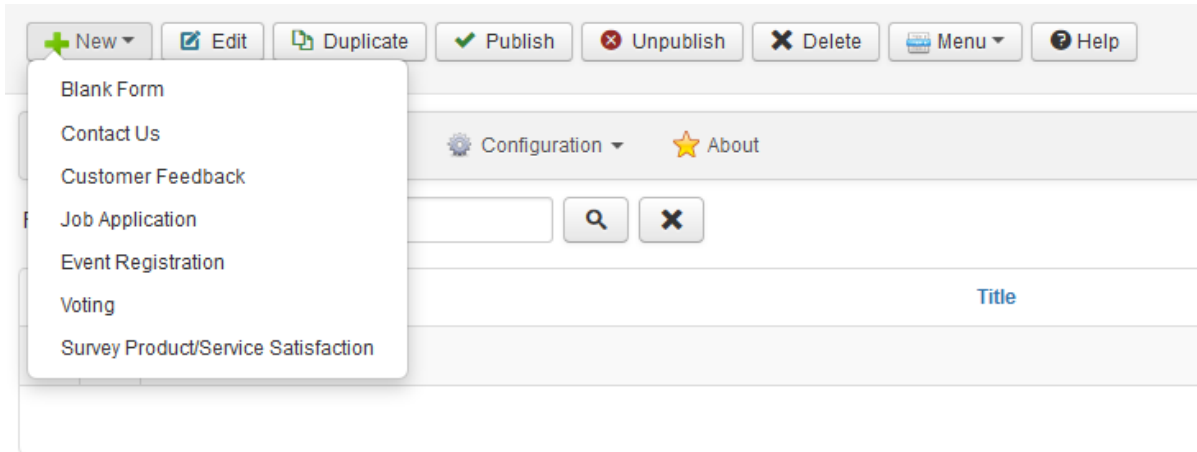

Archive 2.5 package download file - No support « [Download here](#) »

☐ JSN UniForm Configuration manual
This package contains PDF documents "Configuration Manual" of JSN UniForm component.
Version: 3.2.6 Date: 23 April 2015 Size: 2.55MB [Download](#)

In the Customer Area, you can choose to download the appropriate JSN Uniform installation file and documentation.

Form Samples **PRO**

To help you easily create your form, JSN UniForm provides you with 5 sample forms in the back-end even without the sample data installation step. When you want to use one of these forms, you can use them as they are or take them as examples to configure your own form.

For instant, here is the **Event Registration** form. On the demo of JSN UniForm, you can check out more [sample forms](#).

Form Presentation

With the **Save & Show** button, you can quickly present your form via menu items, in module position or inside an article with a single click.

Prevent Spam

To protect your website from spam, the Captcha function should be used. The system will require submitters to fill in the reCAPTCHA to to protect forms from spam and abuse.

The image shows a web form with the following fields:

- Name ***: A dropdown menu with 'Mr' selected, followed by input boxes for 'First', 'Middle', and 'Last'.
- Email ***: A single-line text input box.
- Website**: A single-line text input box containing 'http://'.
- Company**: A single-line text input box.
- Message**: A large multi-line text area.

Below the Message field is a reCAPTCHA widget. It displays two words: 'occupation' and 'lotgra'. Below the words is a text input box with the prompt 'Type the two words:'. To the right of the input box are icons for refreshing, volume, and help. Further right is the reCAPTCHA logo with the text 'reCAPTCHA™ stop spam. read books.'.

At the bottom of the form is a blue 'Submit' button.

How Captcha appears in Form

There are two Capcha technology options: **ReCaptcha** and **Securimage**:

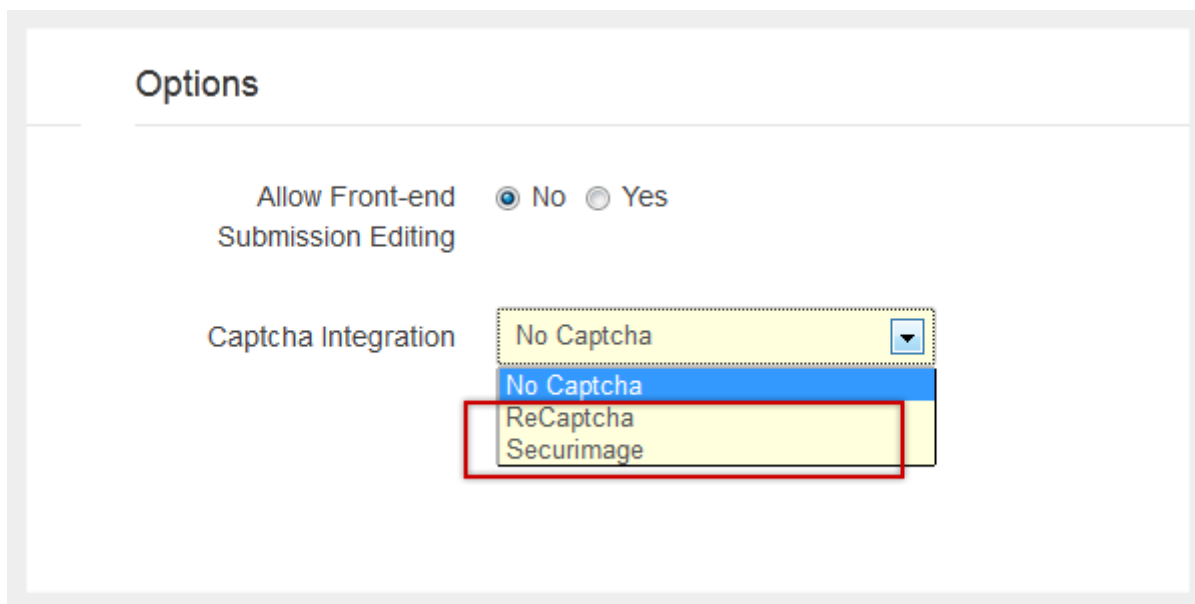

Securimage

ReCaptcha

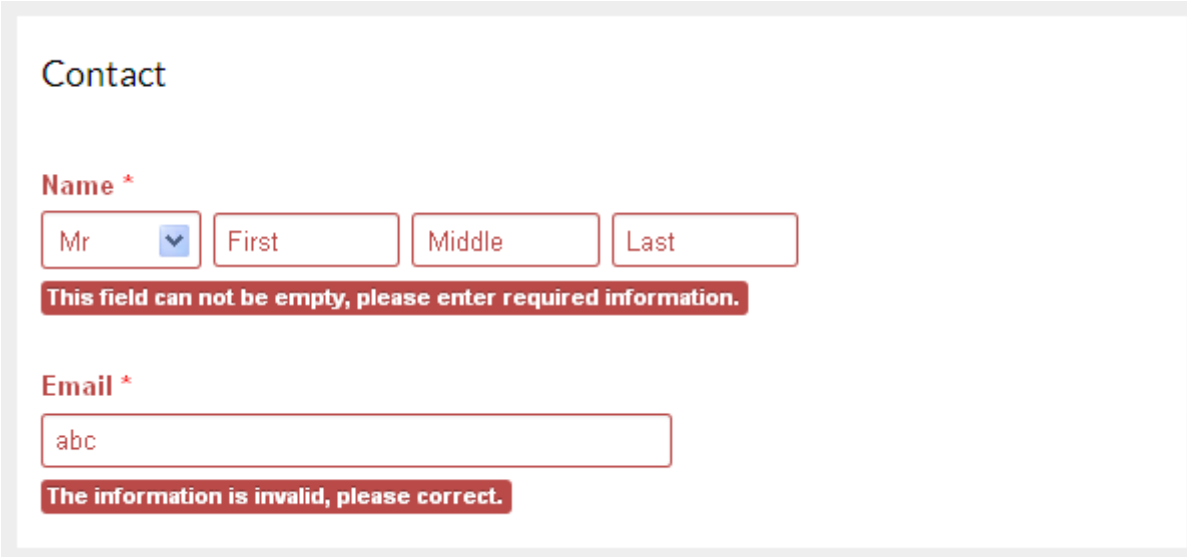

To add a Captcha field, you go to **Form Setting** -> **General** -> **Captcha integration** then choose one type that you desire.

A screenshot of the 'Options' section in the Joomla! configuration interface. The section is titled 'Options' and contains two settings. The first setting is 'Allow Front-end Submission Editing', which has two radio buttons: 'No' (selected) and 'Yes'. The second setting is 'Captcha Integration', which has a dropdown menu. The dropdown menu is open, showing three options: 'No Captcha', 'ReCaptcha', and 'Securimage'. The 'ReCaptcha' option is highlighted with a red border, indicating it is the selected option.

Choose Captcha Integration

Validate information

This will instruct submitters to correctly complete the form using the built-in validation rule by showing an instructional message to submitters.

The screenshot shows a Joomla! contact form titled "Contact". It contains two main sections: "Name *" and "Email *".

Name *

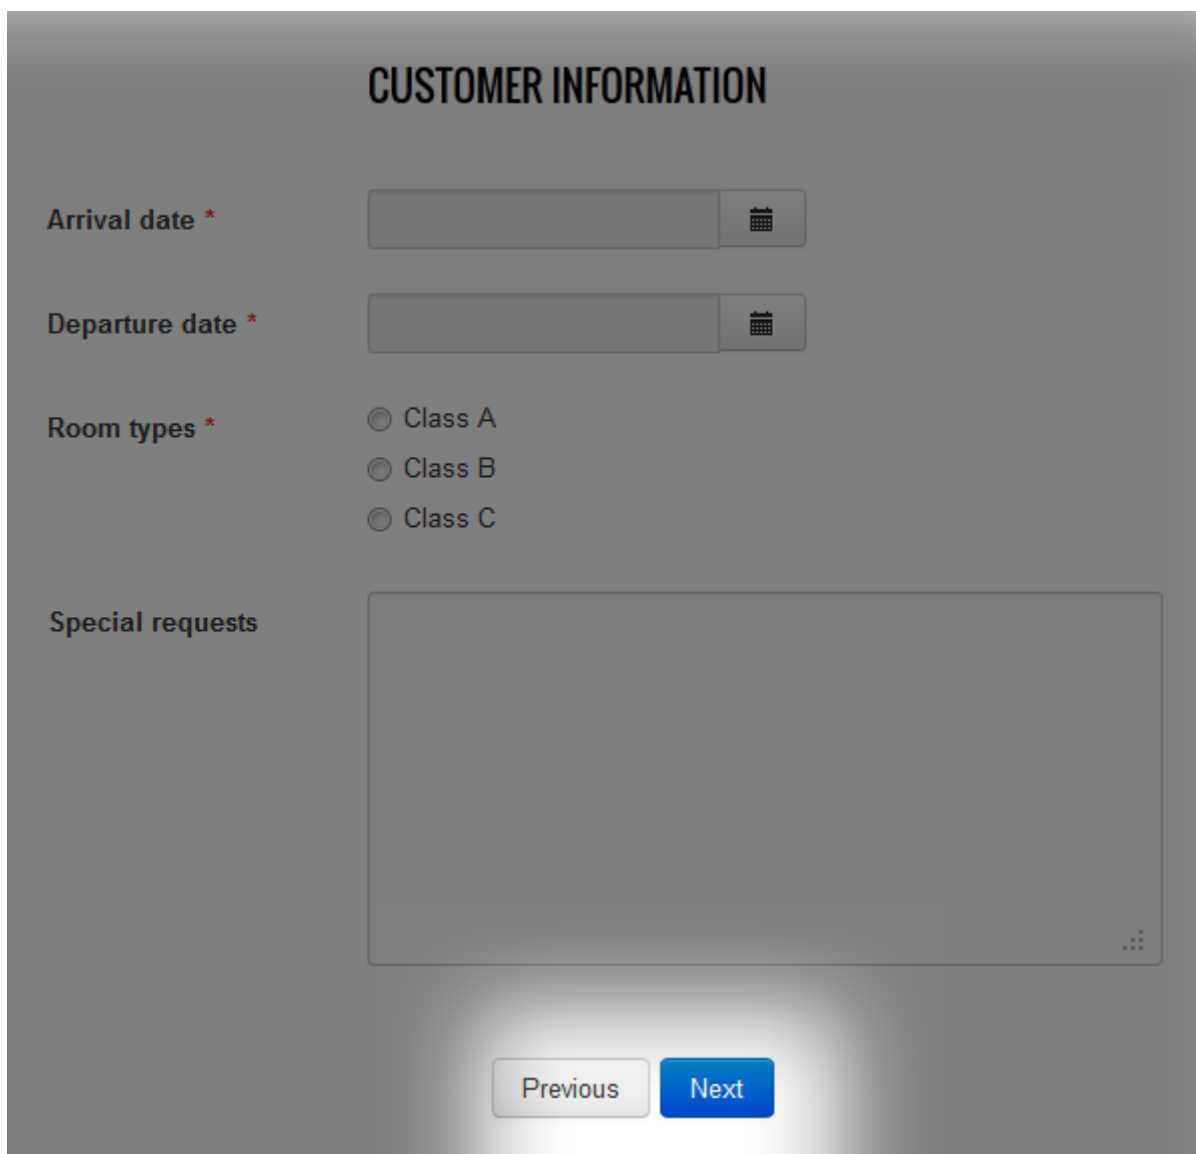

The name section consists of four input fields: a dropdown menu with "Mr" selected, and three text boxes labeled "First", "Middle", and "Last". Below these fields is a red error message: "This field can not be empty, please enter required information."

Email *

The email section consists of a single text box containing the text "abc". Below this field is a red error message: "The information is invalid, please correct."

Multiple pages form

You do not have to worry about limited page forms any more, JSN UniForm allows you create as many pages as you like in your form.

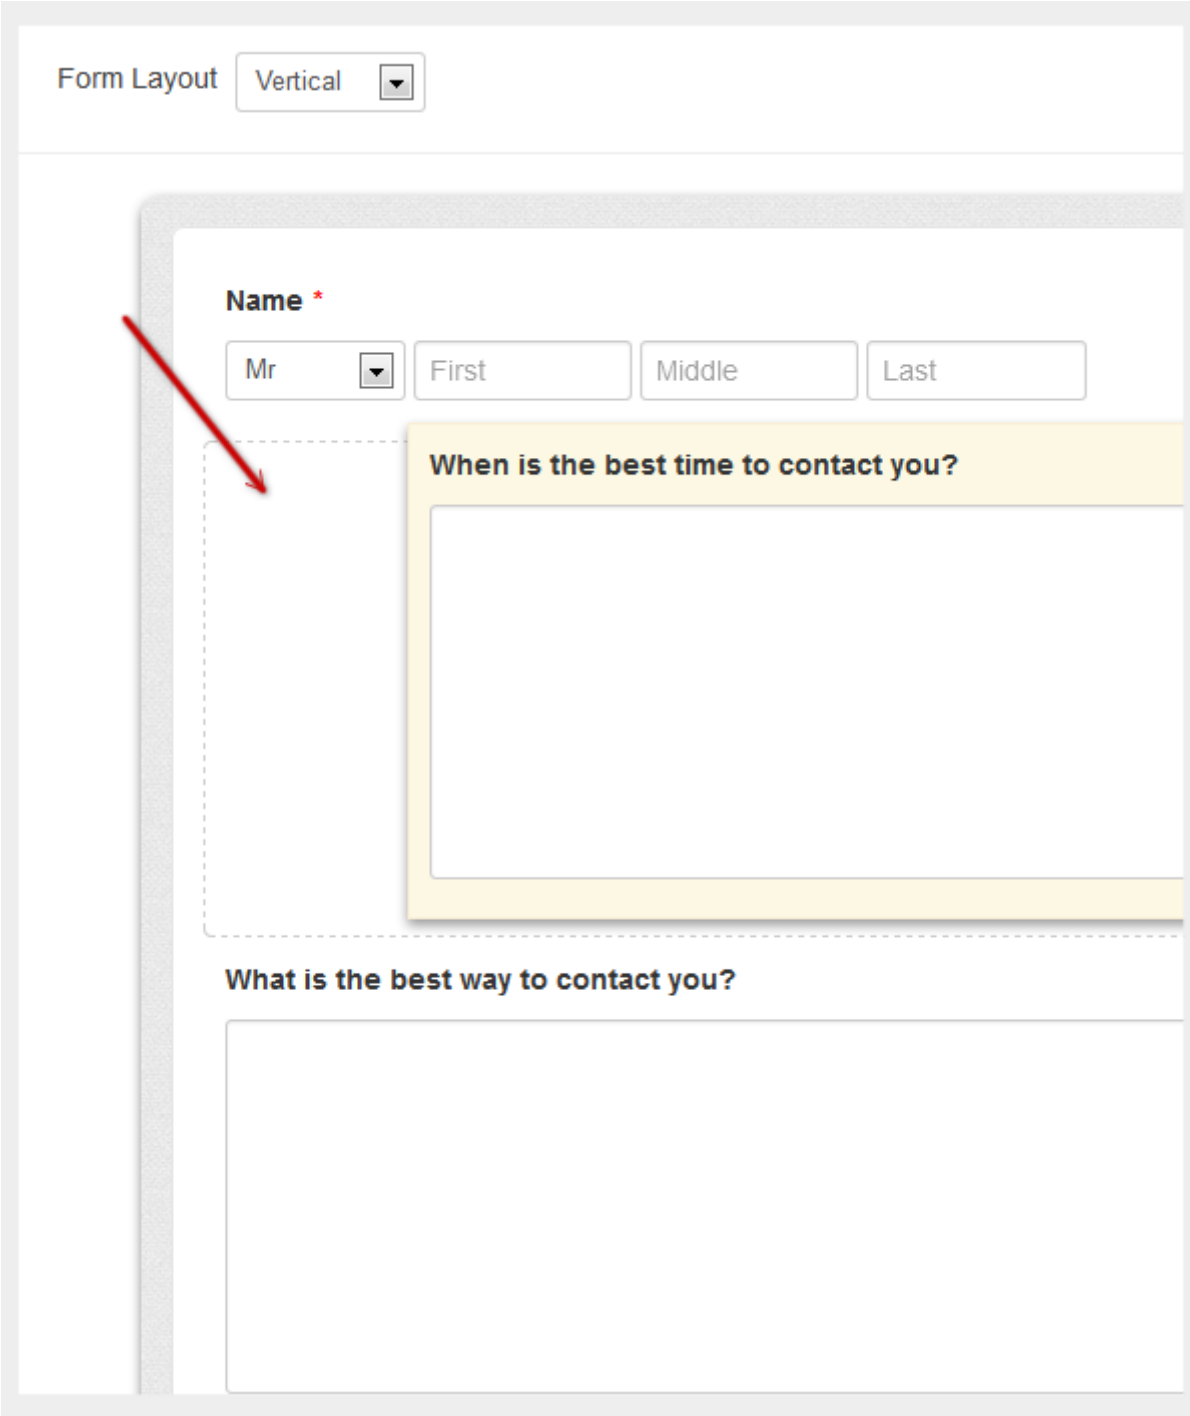

The screenshot displays a multi-page form titled "CUSTOMER INFORMATION". The form is divided into several sections:

- Arrival date ***: A text input field followed by a calendar icon.
- Departure date ***: A text input field followed by a calendar icon.
- Room types ***: Three radio button options labeled "Class A", "Class B", and "Class C".
- Special requests**: A large, empty text area for additional information.

At the bottom of the form, there are two buttons: "Previous" (disabled) and "Next" (active).

Drag and drop

You can save a lot of time with intuitive drag and drop operations. This can be used in many processes when working with JSN UniForm.

The screenshot displays the JSN UniForm configuration interface. At the top, there is a 'Form Layout' section with a dropdown menu set to 'Vertical'. Below this, a form layout is shown with a 'Name *' field containing sub-fields for 'Mr' (a dropdown), 'First', 'Middle', and 'Last'. A red arrow points from the left side of the interface to a dashed-line placeholder box. A yellow-bordered box containing the text 'When is the best time to contact you?' is being dragged into this placeholder. Below the placeholder, another question 'What is the best way to contact you?' is visible with its corresponding text input area.

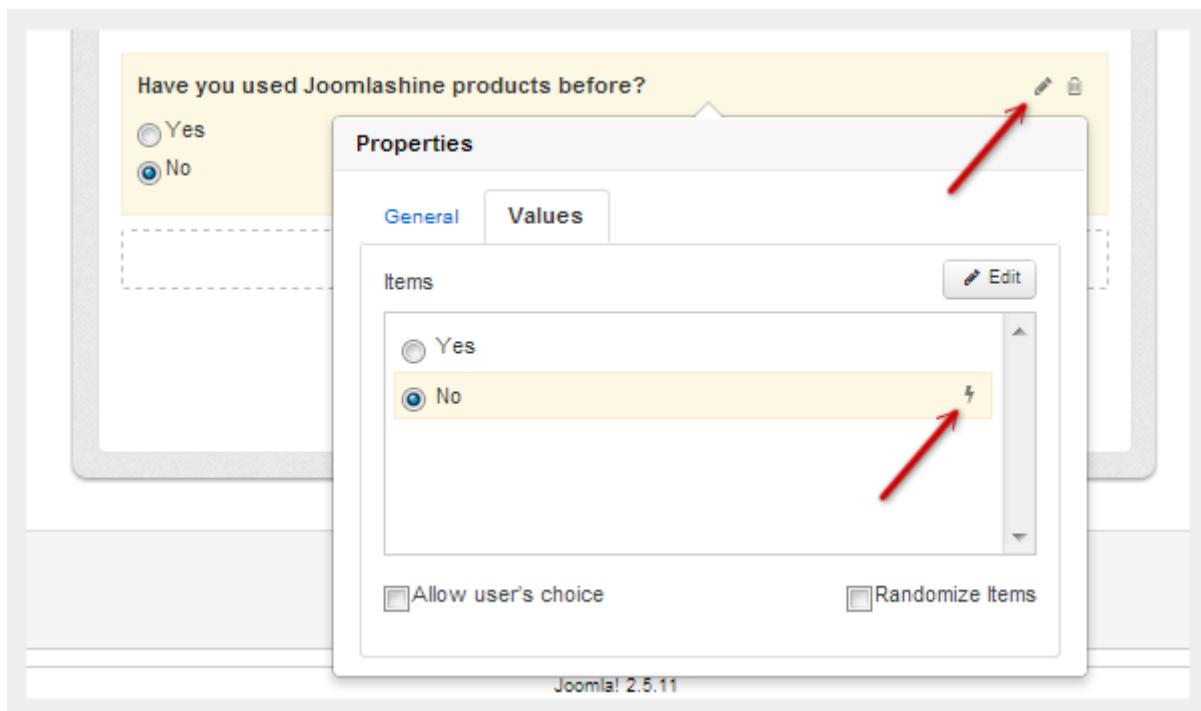

Conditional form fields

To simplify the form filling process, from version 1.5.x, JSN Uniform provides you conditional form fields.

For instance, there is a multiple choice field “*Have you used Joomlashine products?*” with two answers: **Yes** and **No**.

- If the submitter choose “**Yes**”, the next field “*Which Joomlashine products do you like most?*” should be shown.
- If the submitter choose “**No**”, the next field “*Which Joomlashine products do you like most?*” should be hidden.

To set up this, go to the field “*Have you used Joomlashine products?*”, click the **Edit icon**, choose tab **Value**, click the **Lightning icon** of the option **No**.

Click the Lightning icon

In the **Action settings** window, choose tab **Hide form field(s)** and choose field “*Which Joomlashine products do you like most?*”

The screenshot displays the JSN UniForm configuration interface. On the left, a form is shown with two sections: 'Have you used Joomlashine products before?' with radio buttons for 'Yes' and 'No' (selected), and 'Which Joomlashine product do you like most?' with radio buttons for 'JSN Sky', 'JSN Nuru', and 'JSN Epic'. Below these are dashed boxes for 'Add Field' and 'Add Container', and a 'SUBMIT' button. On the right, the 'Action settings' panel is open, showing a list of form fields to be hidden. The fields listed are Address, Email, Website, Company, Message Subject, Message, Attached File, and 'Which Joomlashine product do you like most?'. The last field is checked with a checkbox and highlighted in yellow. A red arrow points from the 'Add Field' dashed box to the 'Which Joomlashine product do you like most?' field in the settings panel.

Choose the form fields you want to hide

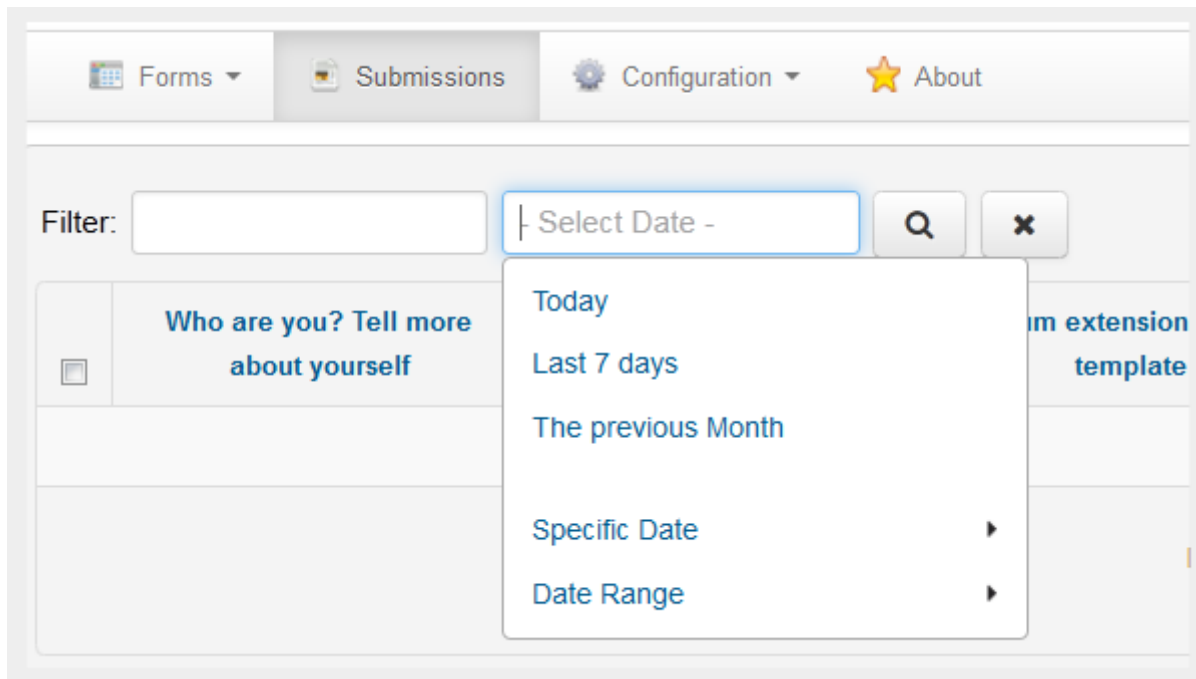

Save the form settings.

Note:

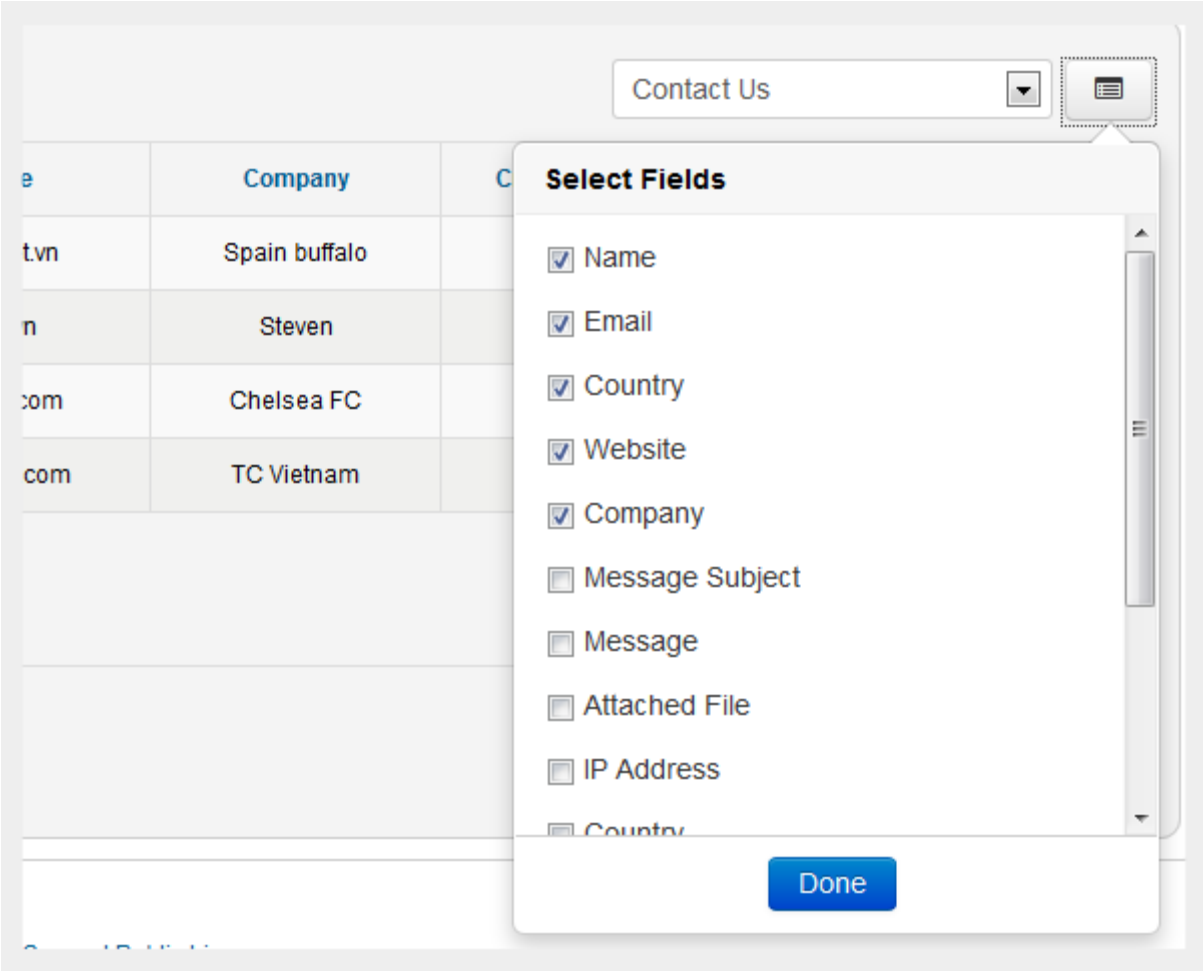

- You can hide as many form fields as you want.
- You can show related form fields which were hidden before. The way to do it is the same as above.
- Hidden fields which are not activated by their parent fields will not be saved or sent via email.

Submission control

With JSN UniForm, managing your data is easier than ever. You can filter the submission information by date, or arrange them by fields.

Filter the submission information by date

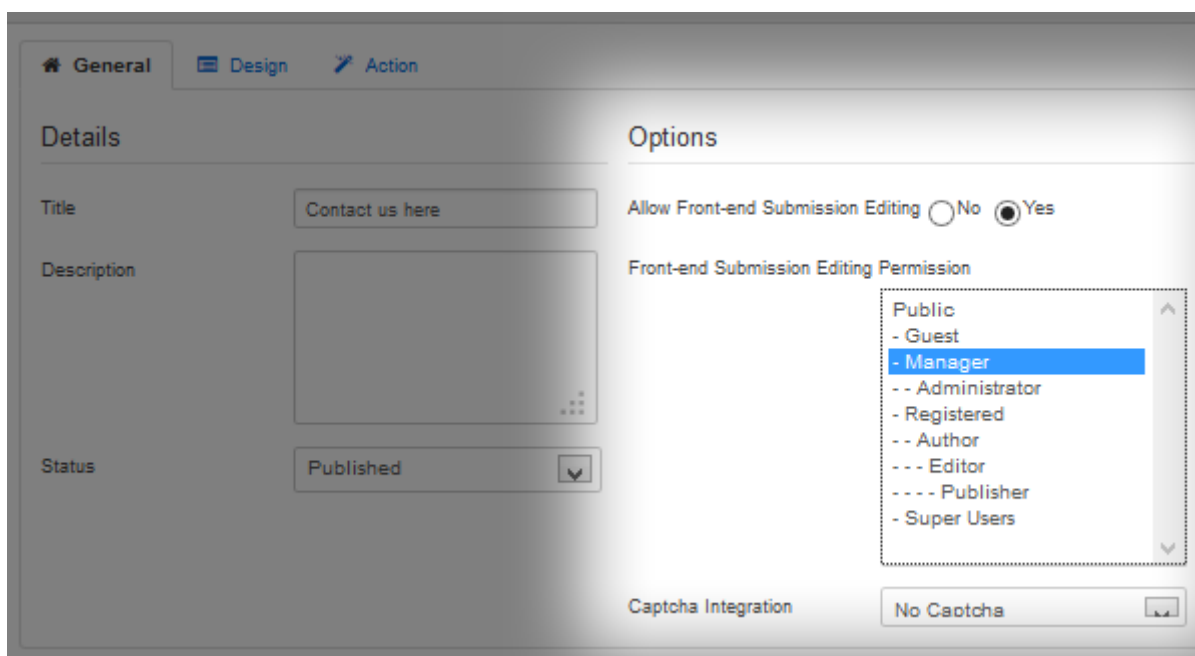

Arrange submission information by fields

View and edit submissions in the front-end

You can publish and edit submission data in the front-end by enabling this feature in form setting in backend.

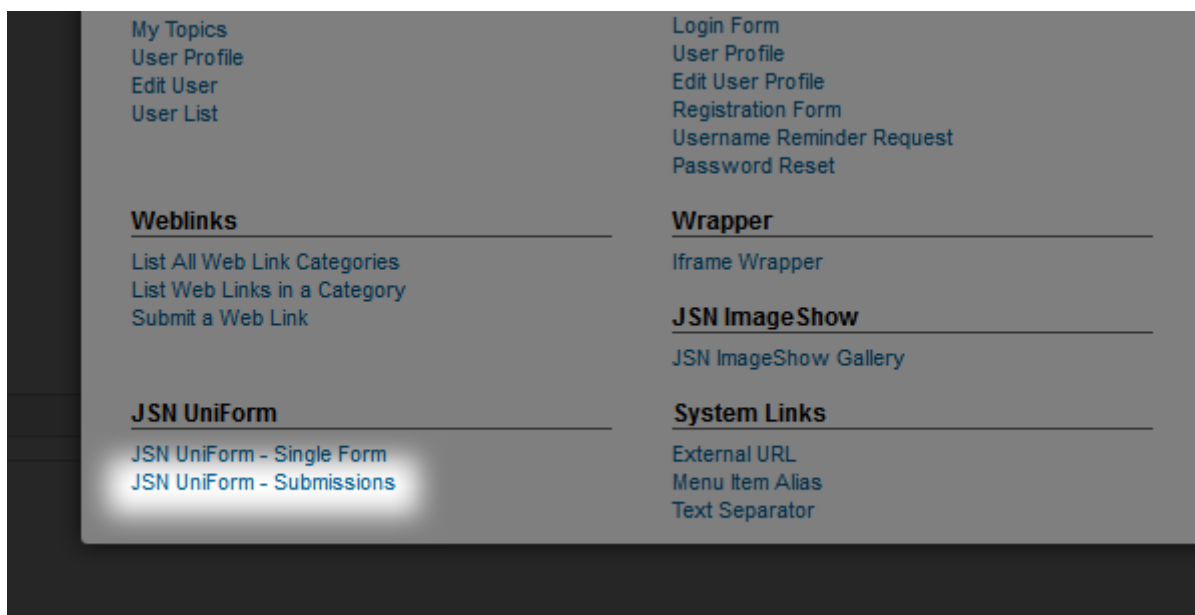

Settings

Go to **Form** -> **General** to set front-end submission editing and its permission. For example, the form below allows front-end submission editing and Manager to edit it.

The screenshot shows the Joomla! JSN UniForm configuration interface, specifically the 'General' tab. The interface is divided into two main sections: 'Details' and 'Options'. In the 'Details' section, the 'Title' is 'Contact us here', the 'Description' is empty, and the 'Status' is 'Published'. In the 'Options' section, the 'Allow Front-end Submission Editing' is set to 'Yes' (indicated by a selected radio button). Below this, the 'Front-end Submission Editing Permission' is set to 'Manager' (highlighted in blue in the dropdown list). Other options include 'Captcha Integration' set to 'No Captcha'.

Then go to **Menus** and add a new menu item, select Menu Item Type as **JSN UniForm – Submissions**

The screenshot shows the Joomla! JSN UniForm configuration interface, specifically the 'Menus' tab. The interface is divided into two main sections: 'My Topics' and 'Weblinks'. Under 'My Topics', there are links for 'User Profile', 'Edit User', and 'User List'. Under 'Weblinks', there are links for 'List All Web Link Categories', 'List Web Links in a Category', and 'Submit a Web Link'. Under 'JSN UniForm', there are links for 'JSN UniForm - Single Form' and 'JSN UniForm - Submissions' (highlighted in blue). Under 'System Links', there are links for 'External URL', 'Menu Item Alias', and 'Text Separator'.

Submissions in the front-end

The screenshot displays the JSN UniForm configuration interface. At the top, there is a 'Filter' section with a text input and a '- Select Date -' dropdown. To the right are search and close buttons. Below this is a table with three columns: 'Email', 'Address', and 'Country'. The table contains three rows of user submissions. An orange-bordered 'Select Fields' dialog box is open on the right side of the table. This dialog lists various fields with checkboxes: 'Website' (unchecked), 'Email' (checked), 'Address' (checked), 'IP Address' (unchecked), 'Country' (checked), 'Browser' (unchecked), 'Operating System' (unchecked), 'Created By' (checked), and 'Date Created' (checked). A 'Done' button is at the bottom of the dialog. Below the table, there is a 'Display Num' dropdown set to '20'.

Submission details can be edited in the front-end

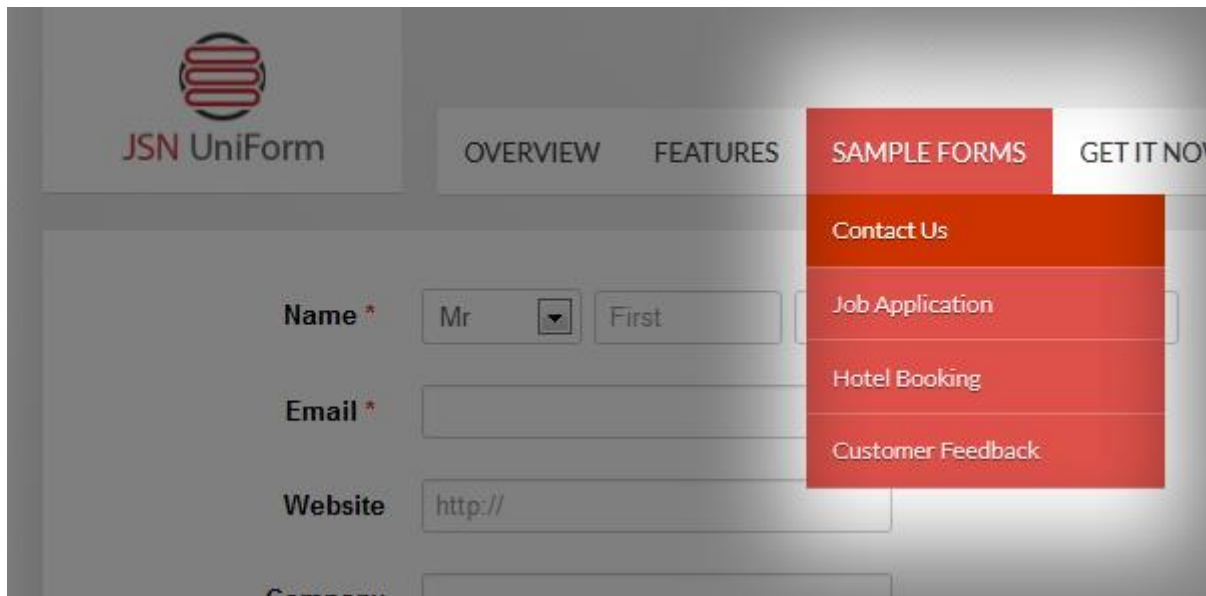

Notification e-mails

You can add multiple recipients for the admin notification e-mails. You can also customize the content of the e-mail by selecting the relevant values.

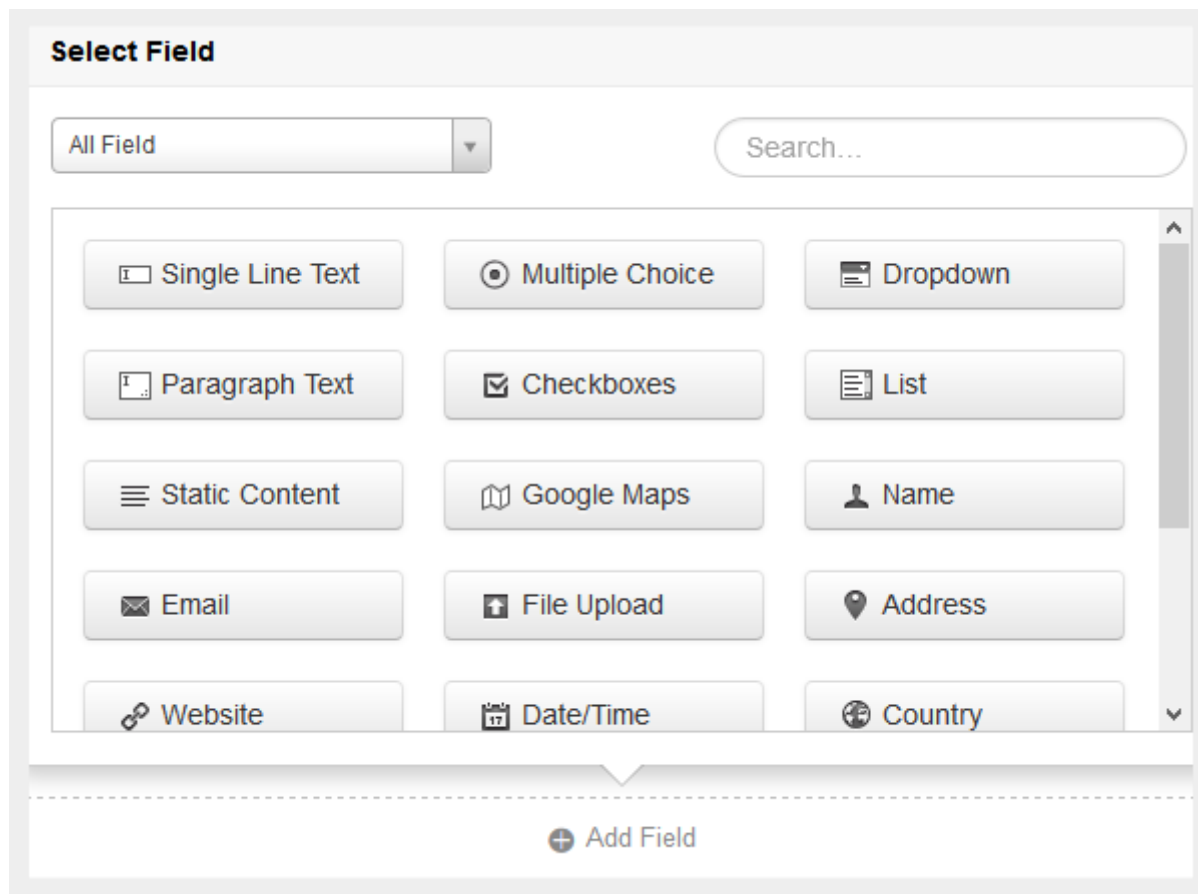

Multiple forms

You can create as many forms as you want. In a single form you can also choose the most suitable fields for your form.

Multiple forms

The screenshot shows a 'Select Field' dialog box. At the top, there is a dropdown menu set to 'All Field' and a search bar labeled 'Search...'. Below these, a grid of 15 field types is displayed in a 5x3 layout. Each field type is represented by a button with an icon and a label. The field types are: Single Line Text, Multiple Choice, Dropdown, Paragraph Text, Checkboxes, List, Static Content, Google Maps, Name, Email, File Upload, Address, Website, Date/Time, and Country. At the bottom of the grid, there is a dashed line and a button labeled '+ Add Field'.

Mobile Support

With its responsive layout, JSN UniForm helps you display your form on every mobile device and browser beautifully and without problems.

The image shows a screenshot of a mobile device screen displaying a contact form. The status bar at the top shows 'Viettel' as the carrier, a Wi-Fi signal, the time '10:57 AM', and a battery level of '69%'. The app's header is a white bar with the word 'MENU' on the left and a circular icon with a monitor symbol on the right. Below the header, the title 'Contact' is centered. The form consists of three sections: 'Name' with a red asterisk, featuring a dropdown menu with 'Mr' selected, and three text input fields labeled 'First', 'Middle', and 'Last'; 'Email' with a red asterisk and a single text input field; and 'Website' with a text input field containing 'http://'. At the bottom of the screen is a dark blue iOS-style navigation bar with icons for back, forward, share, bookmarks, and a tab indicator showing '3'.

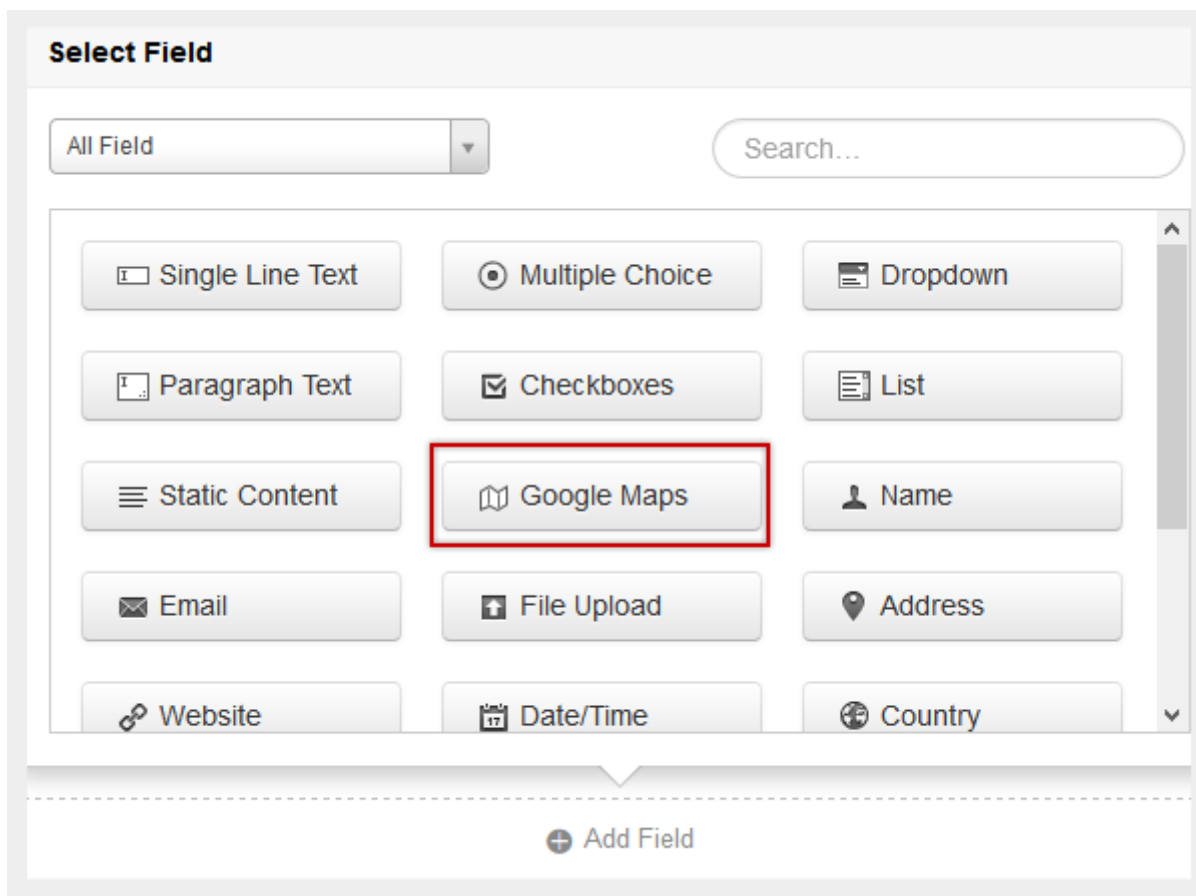

Google Maps integrated

You can integrate [Google Maps](#) to your form with JSN UniForm easily, without installing additional plugins.

The screenshot displays a web form with a red background. At the top, there is an "Email" label followed by a white input field. Below it is a "Message" label with a red asterisk, followed by another white input field. The main part of the form features a Google Map of Hanoi, Vietnam, showing the Hoan Kiem District and surrounding areas. The map includes labels for various streets, landmarks, and districts. At the bottom of the form, there is a blue "SUBMIT" button.

Gmaps integrated in JSN Uniform's front-end

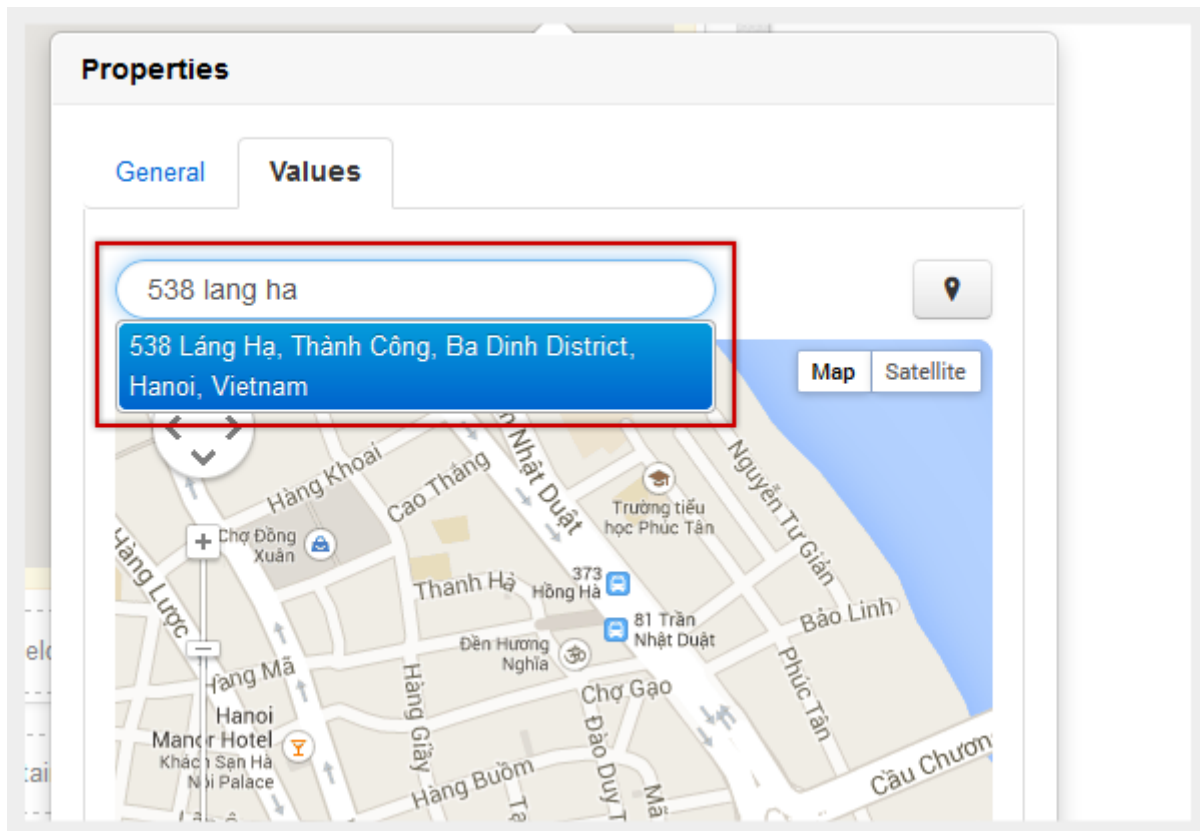

To add a map into your form, you go to **Design** -> **Add field** -> Select **Google Maps**.

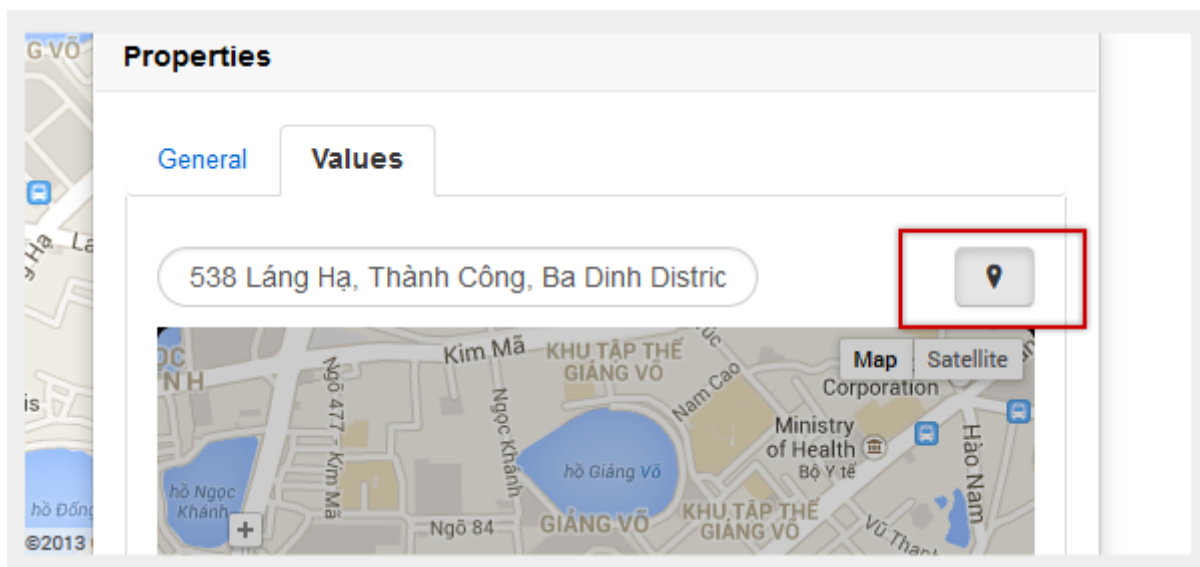

You can search for a specific location which you desired to be shown in your form. In addition, you can easily create a new location which contains full information: title, address, image and URL.

Here under is an instance of creating a location of *samplesite.com*

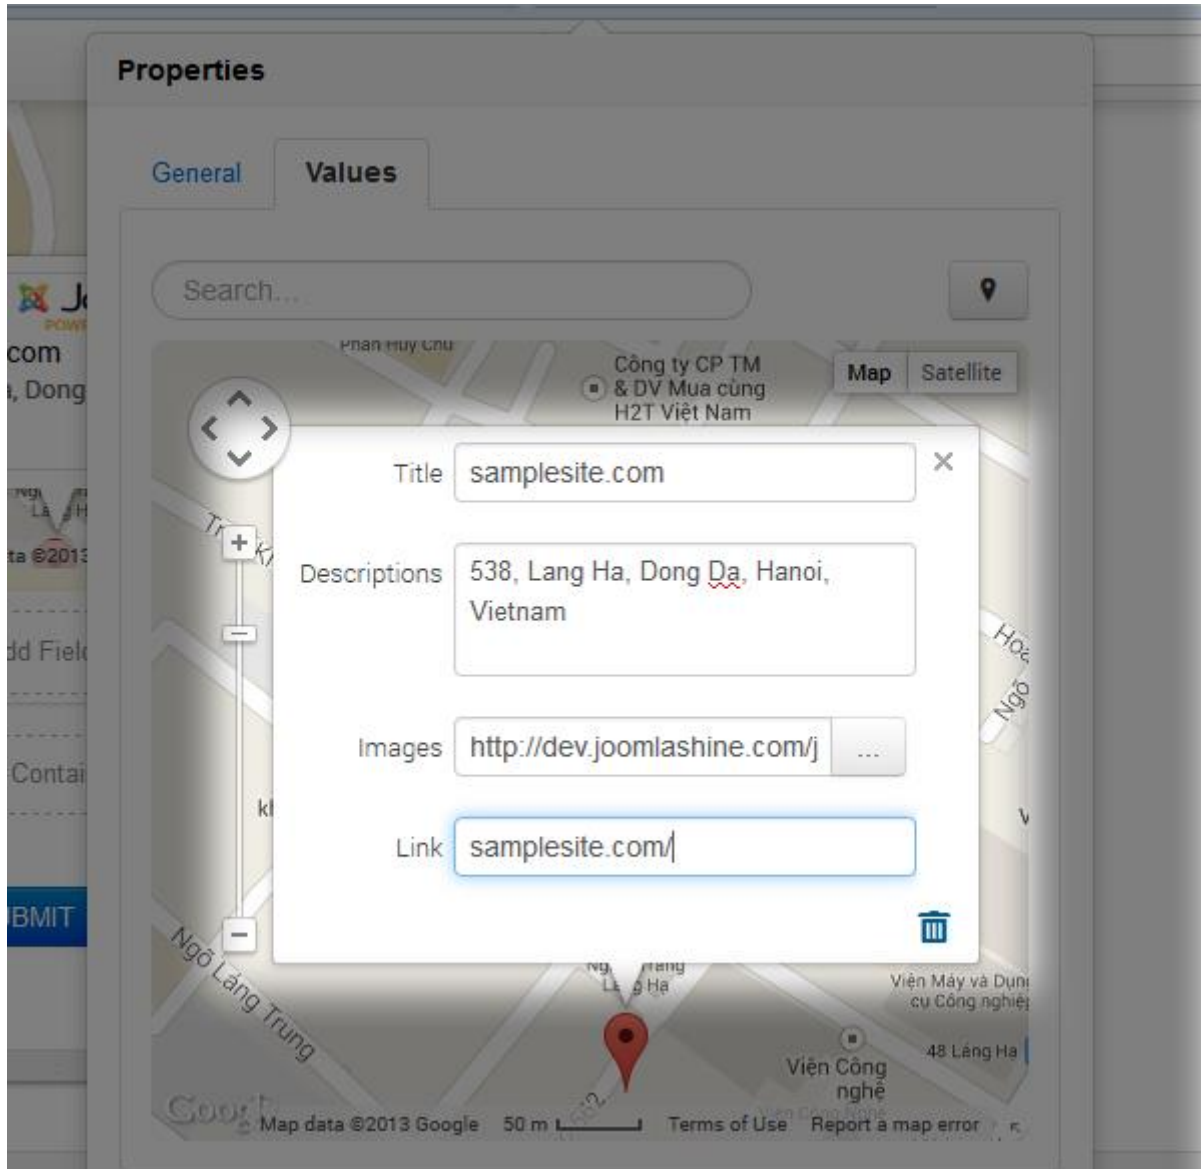

Firstly you search the location in the search load.

Click the **add location** button in the right hand side.

Select the location in the map and full fill the necessary information containing title, description, image, and URL.

Save your form and check the front-end, you will see the result.

Installation

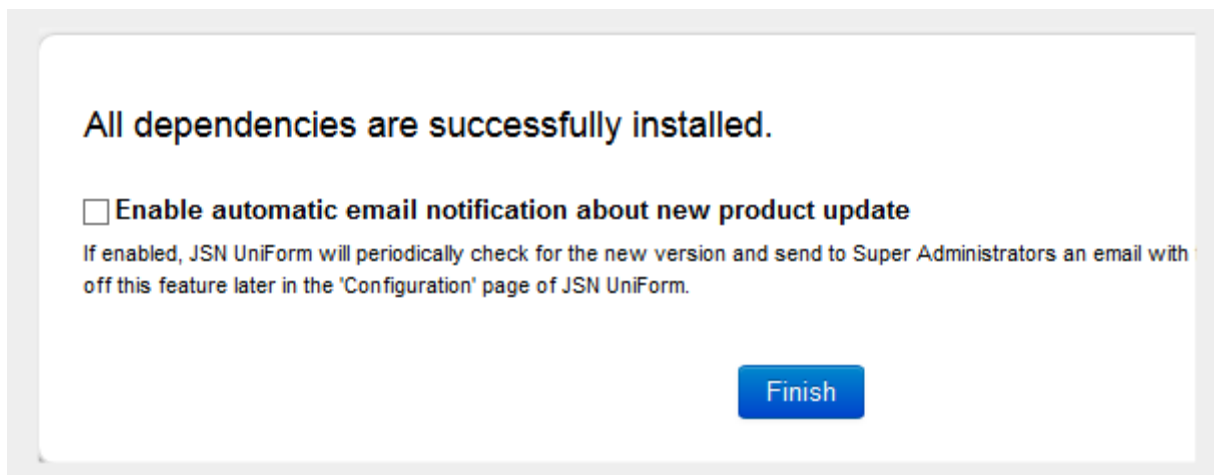

After downloading, you should have an extension installation file called

jsn_uniform_XXX_jY.Y_Z.Z.Z_install.zip, where:

- **XXX** is the extension edition. It can be **free** or **pro**.
- **Y.Y** is the Joomla! version supported by the extension (**3.x**).
- **Z.Z.Z** is the extension version.

This is a standard Joomla! extension installation file which can be installed in Joomla! administration as usual:

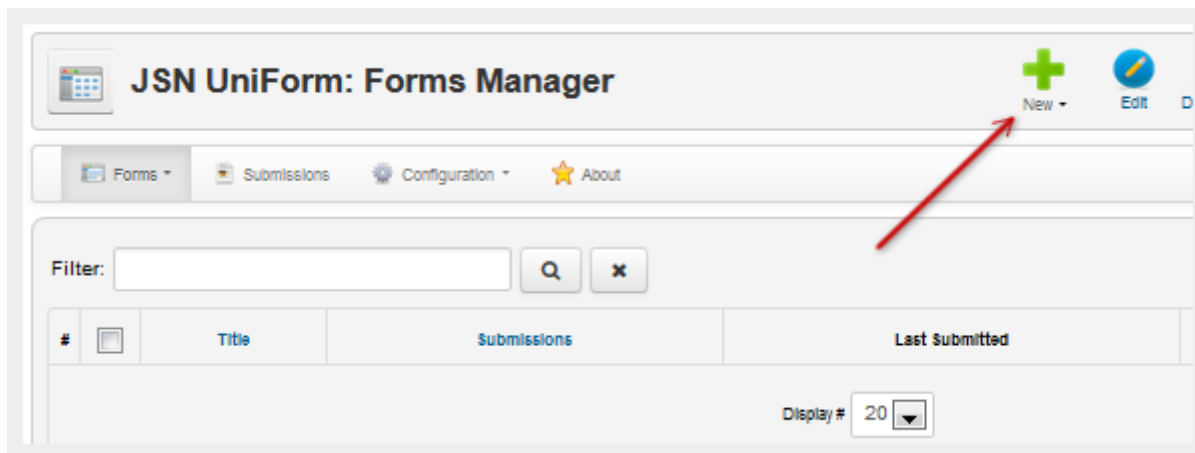

1. In Joomla! administration, go to menu **Extensions** -> **Extension Manager**
2. Once you are in the **Extension Manager**, click the **Browse** button and select the extension installation file **jsn_uniform_XXX_jY.Y_1.Z.Z_install.zip**. After that, click on the button **Upload & Install**.
3. The installation file will be uploaded to your server and installed in Joomla! automatically.
4. After core elements, default theme and image sources have been installed successfully, clear your browser's cache and start using JSN UniForm in your site.

Usage

Set up a form

You go to **Components** -> **JSN UniForm** -> **Form** -> **Form** tab and click the “**New**” button.

There are 3 sub-tabs for you to prepare your form: **General**, **Design** and **Action**.

General

The screenshot shows the 'General' sub-tab in the JSN UniForm configuration. The sub-tabs are 'General', 'Design', and 'Action'. The 'General' tab is active, showing a 'Details' section with input fields for 'Title' and 'Description'.

Here you can set general information for your form: **Title**, **Description**, **Status**, **Access** and **Enable reCAPTCHA**.

Form Design

The screenshot displays the 'Design' tab of the JSN UniForm configuration interface. At the top, there are two tabs: 'Design' (selected) and 'Action'. Below the tabs, there are two dropdown menus: 'Single page' and 'Form Layout' (set to 'Vertical'). The main area shows three form layouts side-by-side for 'Vietnamese', 'English', and 'Japanese'. Each layout is a blue box containing four checkboxes: 'Listen', 'Read', 'Speak', and 'Write'. Below each language box is a dashed box labeled 'Add Field'. The interface is clean and organized, allowing for easy customization of the form content.

Here you can create the form content you require. You just need to select suitable parameters, add new fields, edit them or drag and drop to organize the form layout.

Form Type

There are two options for you to choose from: **Single page** and **Multiple pages**.

- **Single page:** Your form will be presented in only one page.
- **Multiple pages:** Your form will be presented on multiple pages. This option is useful when your form is long.

Form layout

You can choose a **Vertical layout** or **Horizontal layout** for your form.

- **Vertical layout:**

The image shows a vertical form layout with the following fields:

- Name ***: A dropdown menu with "Mr" selected, followed by text input fields for "First", "Middle", and "Last".
- Gender ***: Radio buttons for "Male" and "Female".
- Date of Birth ***: A text input field followed by a calendar icon.
- Email ***: A single-line text input field.
- Phone**: A single-line text input field.
- Address**: A group of fields including "Street Address", "Address Line 2", "City", "State/Province/Region", "Postal/Zip code", and a dropdown menu with "Afghanistan" selected.

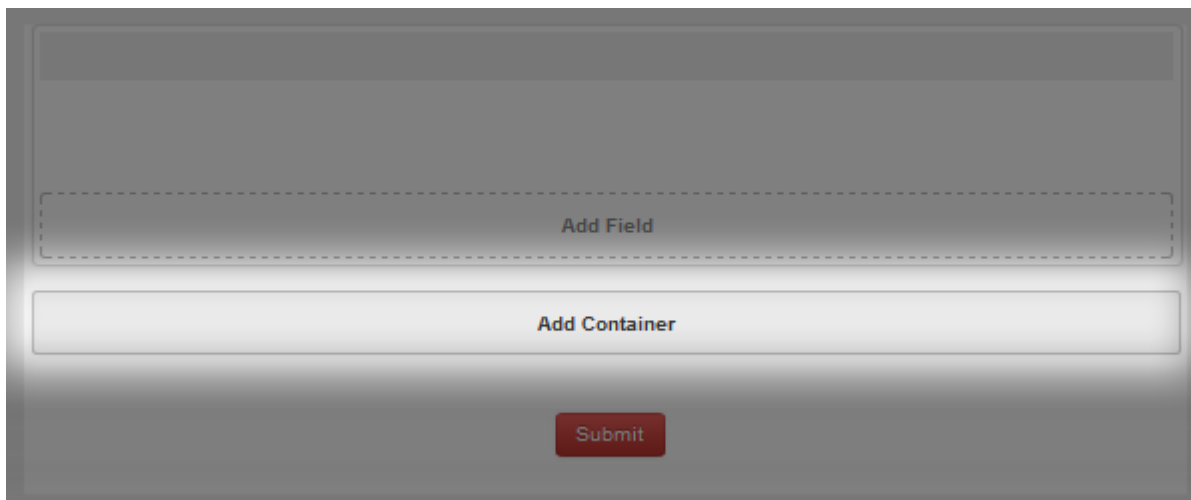

- **Horizontal layout:**

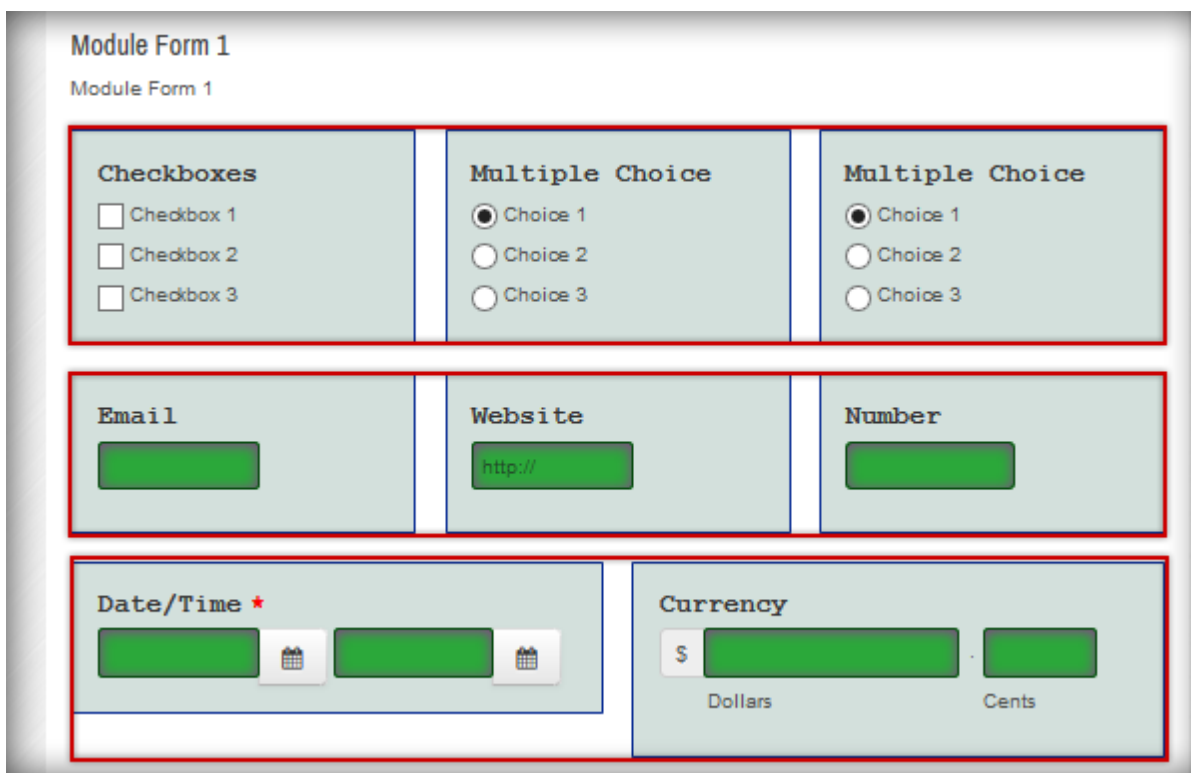

The image displays a horizontal layout form for the JSN UniForm extension. The form is contained within a light gray border and features a light blue background. It is organized into several sections, each with a label and a corresponding input field or fields. The sections are: Name (with a dropdown for Mr, First, Middle, and Last), Gender (with radio buttons for Male and Female), Date of Birth (with a date picker icon), Email (with a single text input field), Phone (with a single text input field), and Address (with multiple input fields for Street Address, Address Line 2, City, State/Province/Region, Postal/Zip code, and a dropdown for Afghanistan). The form is designed to be user-friendly and easy to use.

Name *	Mr	First	Middle	Last
Gender *	<input type="radio"/> Male <input type="radio"/> Female			
Date of Birth *	<input type="text"/>			
Email *	<input type="text"/>			
Phone	<input type="text"/>			
Address	Street Address			
	Address Line 2			
	City		State/Province/Region	
	Postal/Zip code		Afghanistan	
	<input type="text"/>			

Add Container

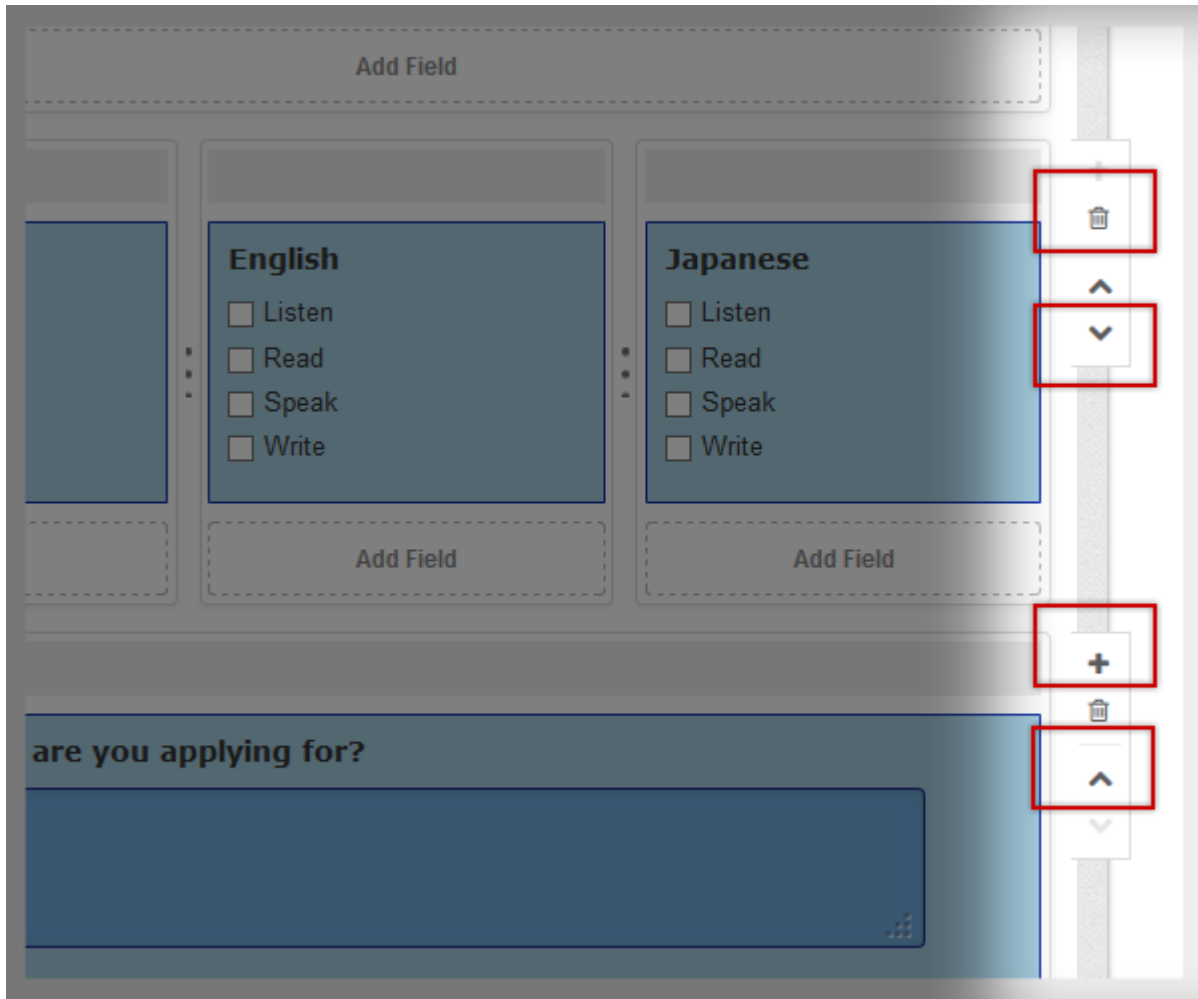

The screenshot shows a configuration window with a dashed box labeled 'Add Field' at the top. Below it is a solid button labeled 'Add Container'. At the bottom of the window is a red 'Submit' button.

To create an area which covers several small fields, you click **Add Container**. Each container can contain a maximum of 3 fields.

The screenshot shows a form layout titled 'Module Form 1'. It contains three containers, each outlined with a red border. The first container has three columns: 'Checkboxes' with three checkboxes, and two 'Multiple Choice' sections, each with three radio buttons. The second container has three columns: 'Email' with a text input, 'Website' with a text input containing 'http://', and 'Number' with a text input. The third container has two columns: 'Date/Time' with two date pickers and a red asterisk, and 'Currency' with a dollar sign, a text input, a decimal separator, another text input, and labels for 'Dollars' and 'Cents'.

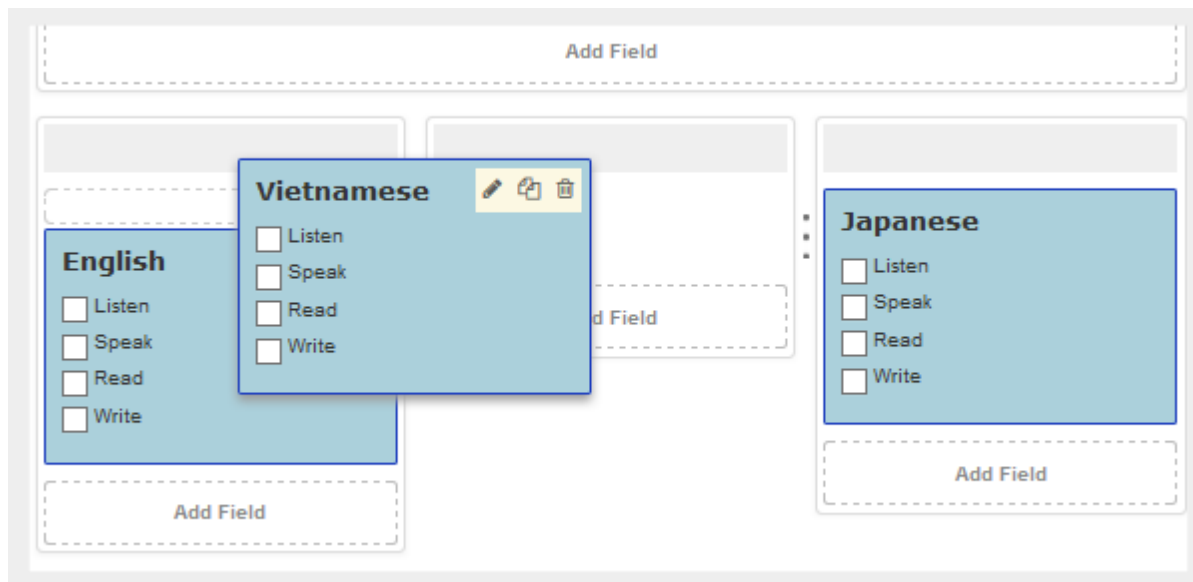

Containers in JSN UniForm

You can **move** the selected container **up** or **down** very easily. In addition, within each container, you can **add columns**, **delete columns** or **drag and drop columns** to change their position.

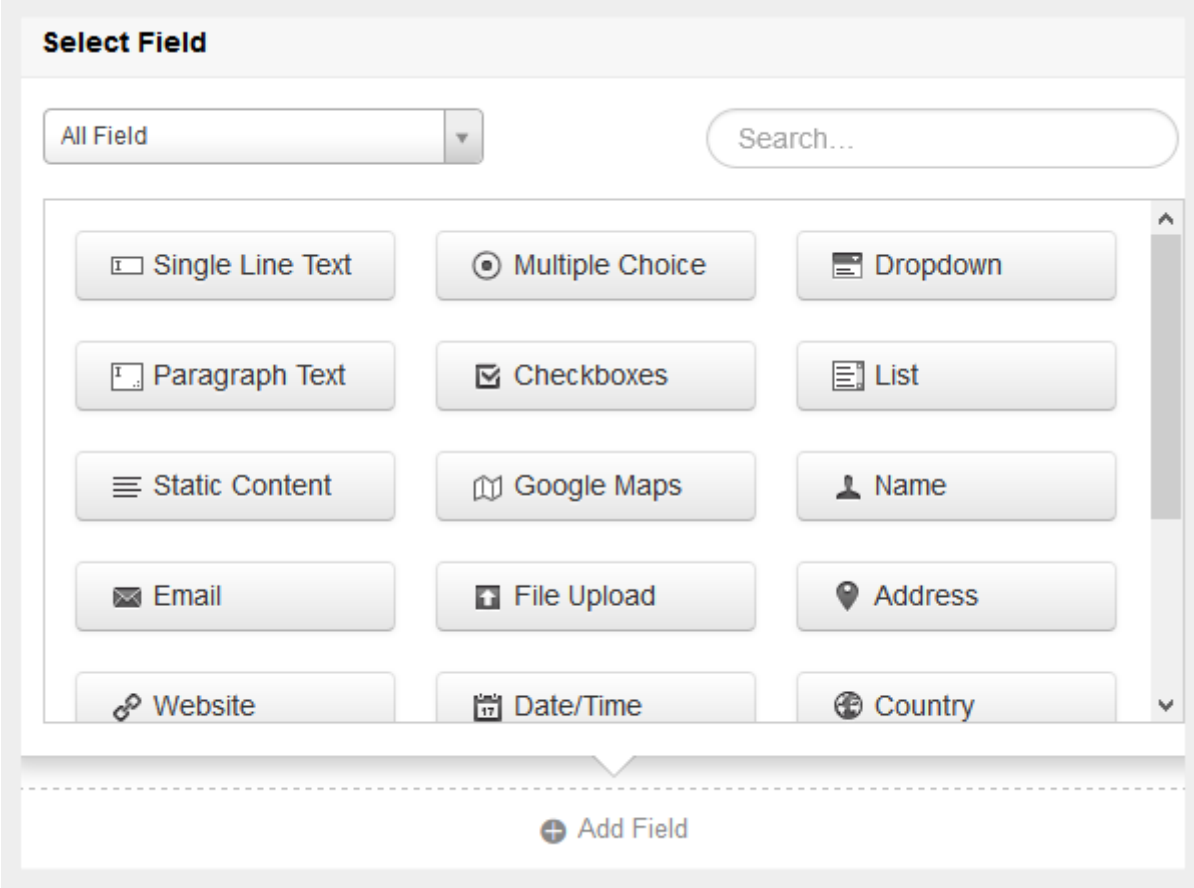

- **Add column:** click the icon  to add one column within a container.
- **Delete column:** click the icon  to delete a column from a container.
- **Move container up:** click the icon  to move the container up.
- **Move container down:** click the icon  to move the container down.

Just as conveniently, to move the position of fields within one container, you can drag the selected field and choose where to drop it.

Add Field

The screenshot shows a 'Select Field' dialog box. At the top, there is a dropdown menu set to 'All Field' and a search bar labeled 'Search...'. Below these, a grid of 15 field type buttons is displayed in a scrollable container. The buttons are arranged in five rows and three columns: Row 1: Single Line Text, Multiple Choice, Dropdown; Row 2: Paragraph Text, Checkboxes, List; Row 3: Static Content, Google Maps, Name; Row 4: Email, File Upload, Address; Row 5: Website, Date/Time, Country. At the bottom of the dialog, there is a dashed line and a button with a plus icon labeled '+ Add Field'.

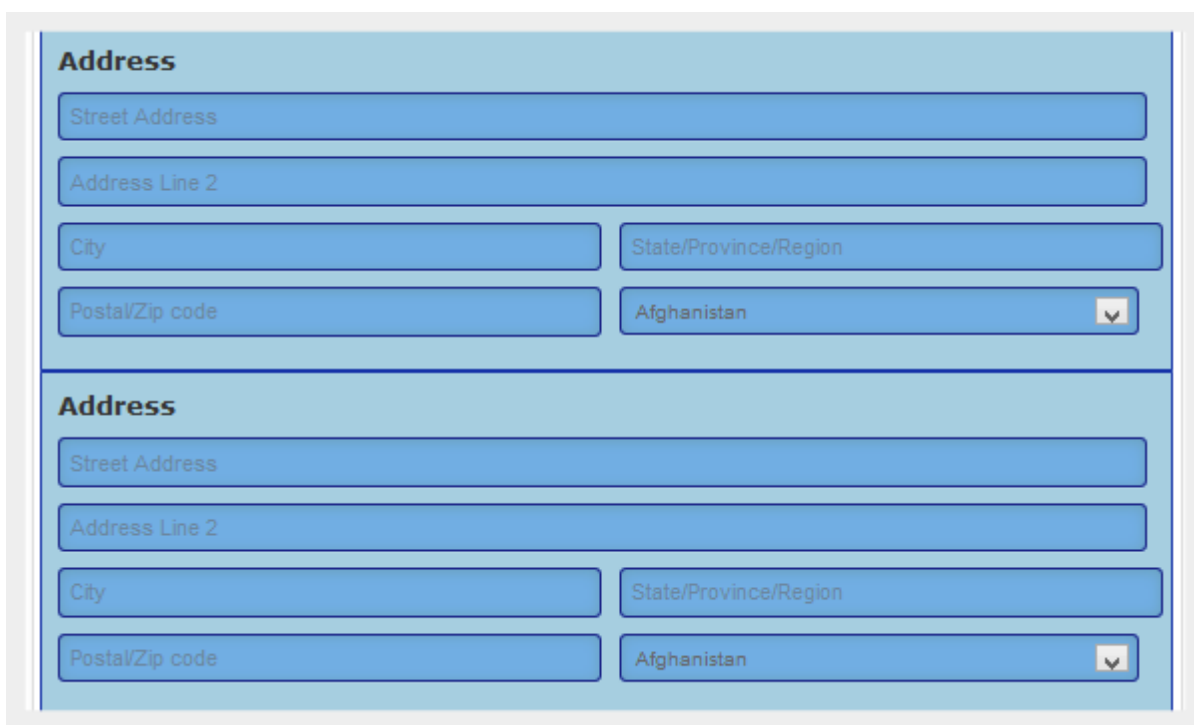

You just need to click section **Add field** to choose suitable fields. Below are the field types you can add to your form:

- **All field:** this type includes all **Standard** and **Extra fields**.
- **Standard field:** Here are fields to build the main form content. There are **Single Line Text**, **Paragraph Text**, **Multiple Choice**, **Checkboxes**, **Dropdown**, **List** and **Google Maps**.
- **Extra field:** Here you can complete your form with additional fields: **Name**, **Address**, **Country**, **Currency**, **Email**, **Website**, **Number**, **Password**, **File Upload**, **Date/Time** and **Phone**

Duplicate field

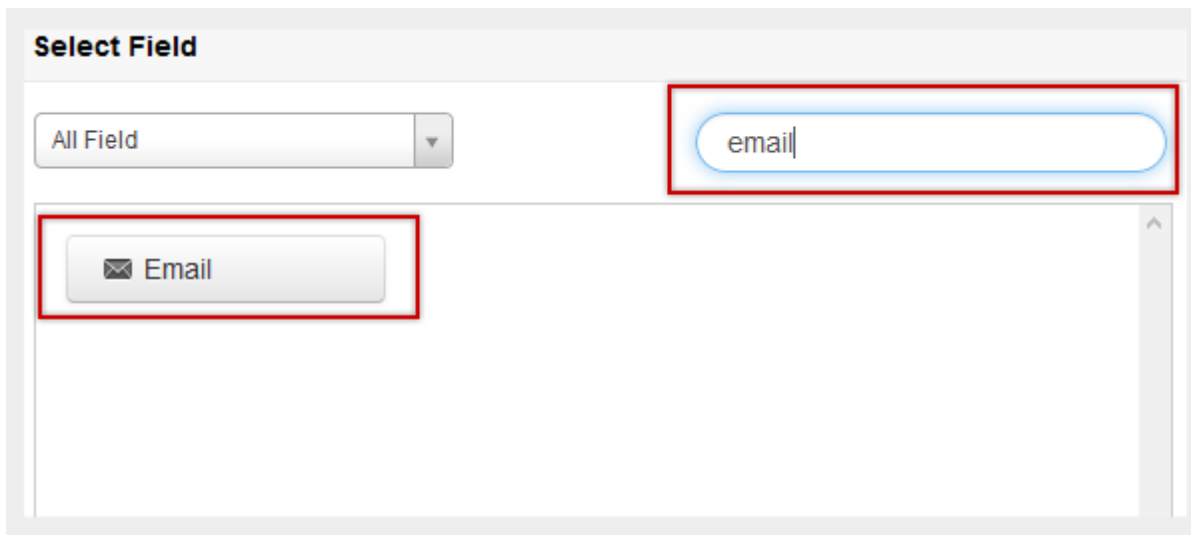

To instantly make a copy of any field, you just need to hover the mouse to the top right of the field and then click the **Duplicate element icon**.

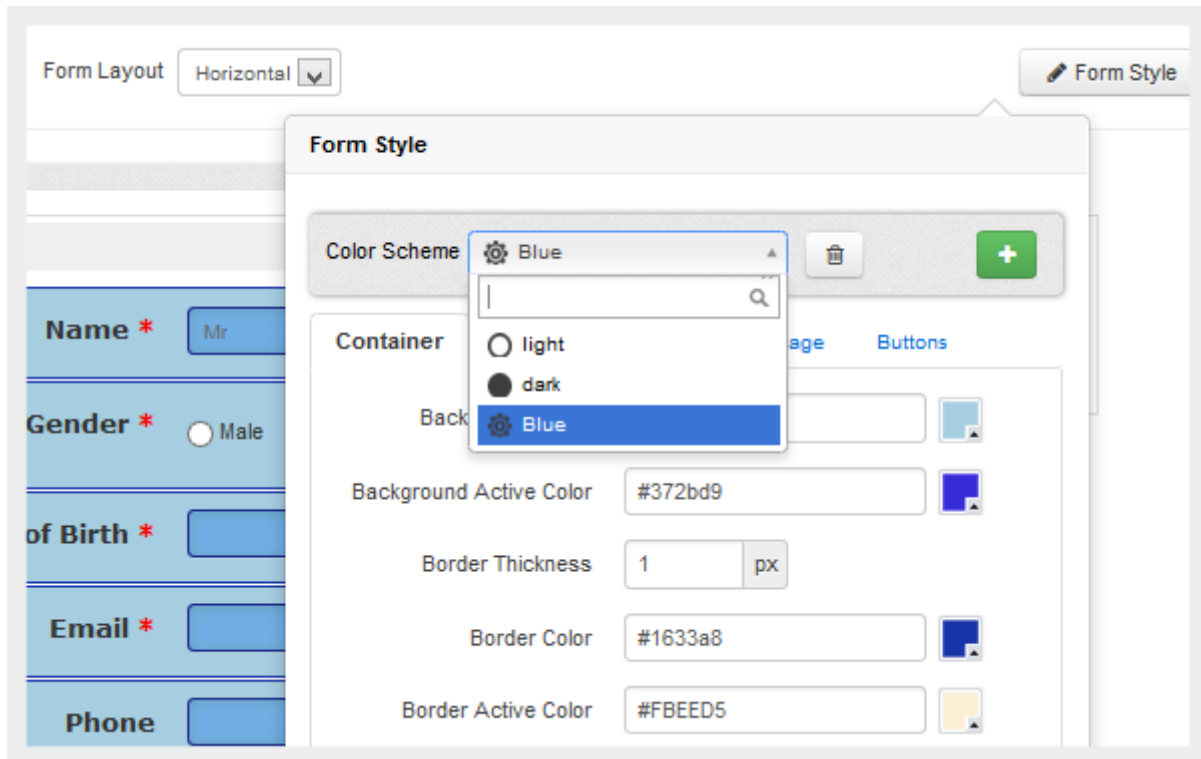

Address field with a duplicate version

Search field

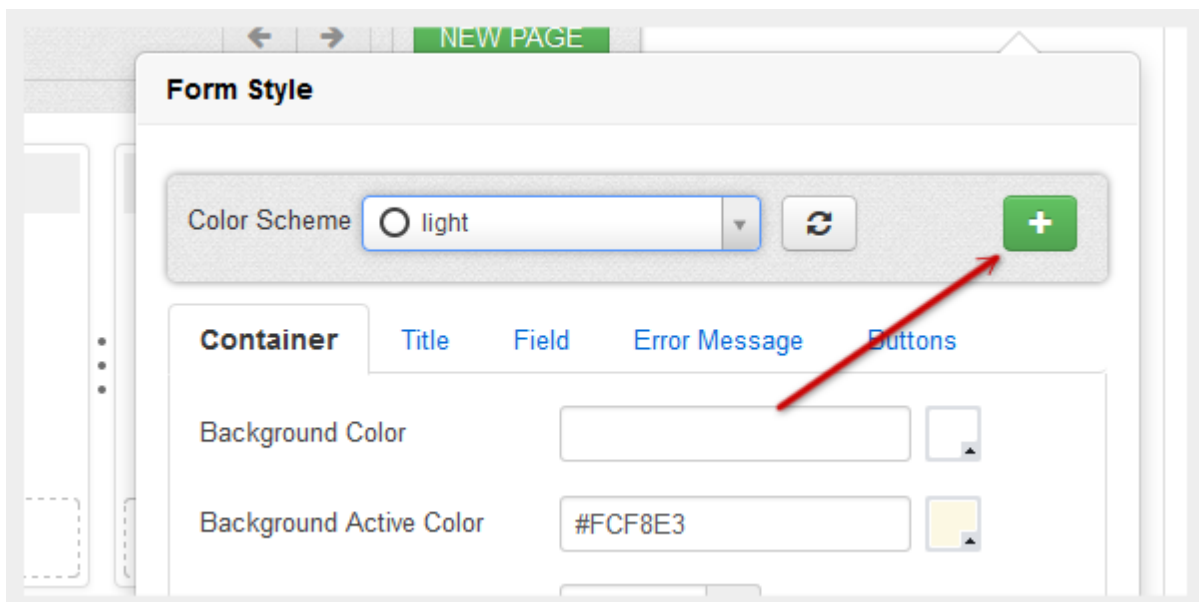

If you want to add a specific field, you can input the field type into the “**Search**” box; the matching field will appear immediately so that you can select it and add it to your form. You can search for **All Fields**, **Standard Field** or **Extra Field**.

Form Style

By default, there are two color schemes for your form: **Light** and **Dark**. Each form style provides you with some options to edit the appearance of the form.

In addition, JSN UniForm provides you with an option to create your own color scheme. To do this, go to the **Form Style** page, click the green 'plus' button, and input a name for your new color scheme.

Now you can customize the new color scheme for your form.

Container

The screenshot displays the 'Form Style' configuration window for JSN UniForm. The 'Color Scheme' is set to 'Blue'. The 'Container' tab is active, showing the following settings:

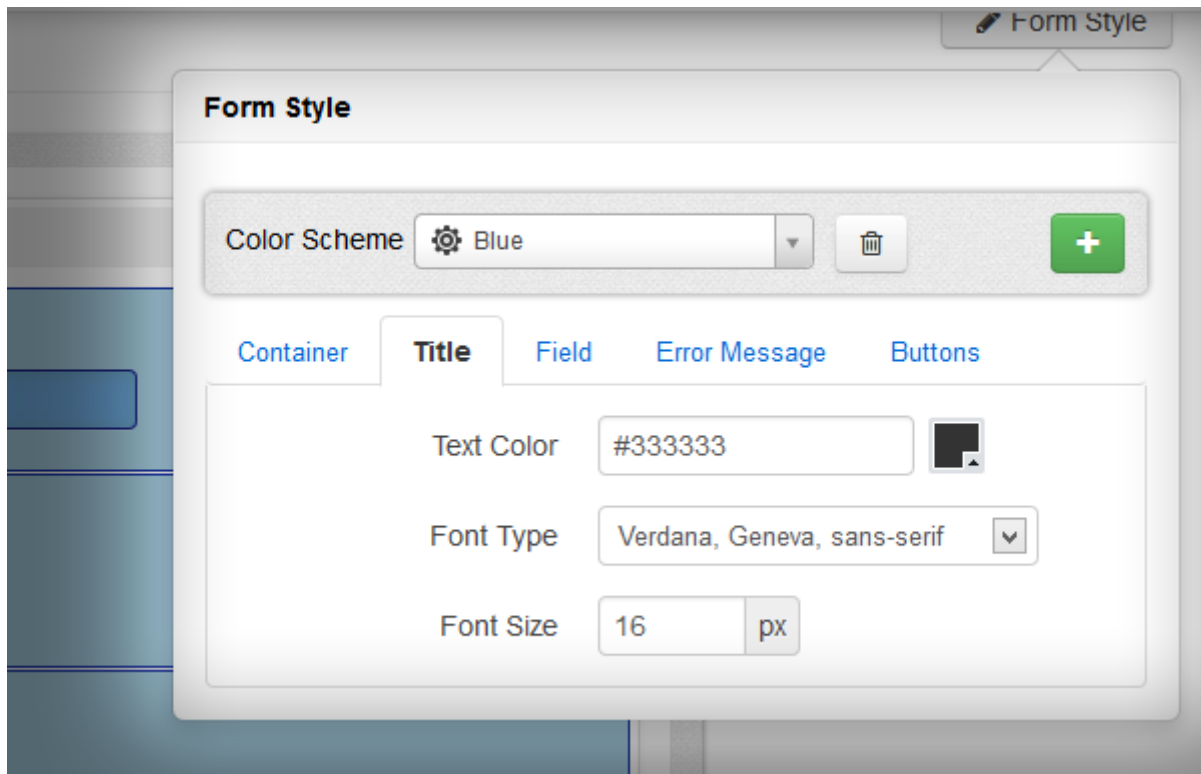

Attribute	Value	Unit
Background Color	#a6cee0	
Background Active Color	#372bd9	
Border Thickness	1	px
Border Color	#1633a8	
Border Active Color	#FBEED5	
Rounded Corner Radius	1	px
Padding Space	10	px
Vertical Space	1	px

The **Container** tab helps you change attributes for form such as background, border, padding, ect. Below are the detailed features of each attribute that you can edit for your form:

- **Background Color:** An attribute which allows you to edit your form's background color.
- **Background Active Color:** An attribute which allows you to edit the activated background color.
- **Border Thickness:** An attribute which specifies the thickness of the border.
- **Border Color:** An attribute which specifies the color of the border.
- **Border Active Color:** An attribute which specifies the activated border color.

- **Rounded Corner Radius:** An attribute which decides how rounded the corners are.
- **Padding Space:** An attribute which specifies the distance between each field and its borders.
- **Vertical Space:** An attribute which specifies the distance between fields.

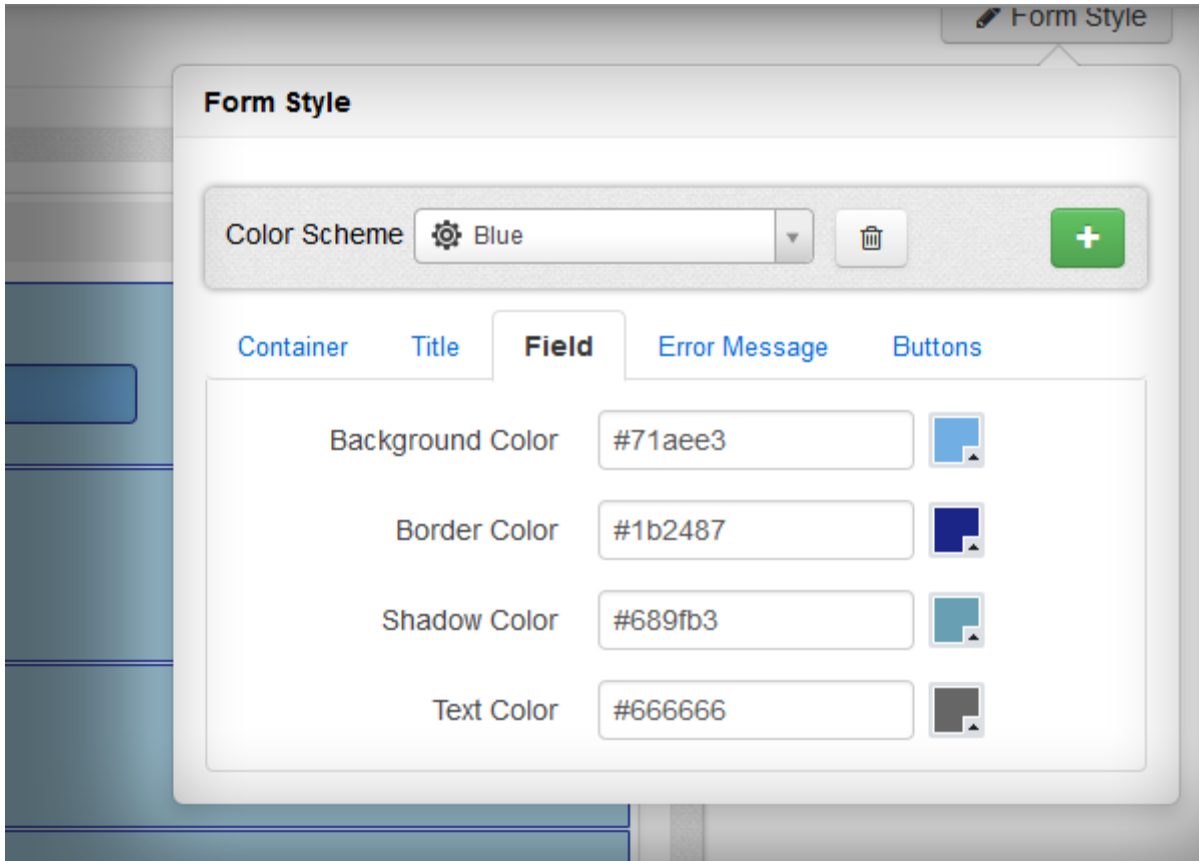

Title

The **Title** tab helps you change the font style for the form, with the attributes as text color, font type, font size. Below are the detailed features of each attribute that you can edit for your form:

- **Text Color:** An attribute which allows you to change text color for your form.
- **Font Type:** An attribute which allows you to change font type for your form.
- **Font Size:** An attribute which allows you to change font size for your form.

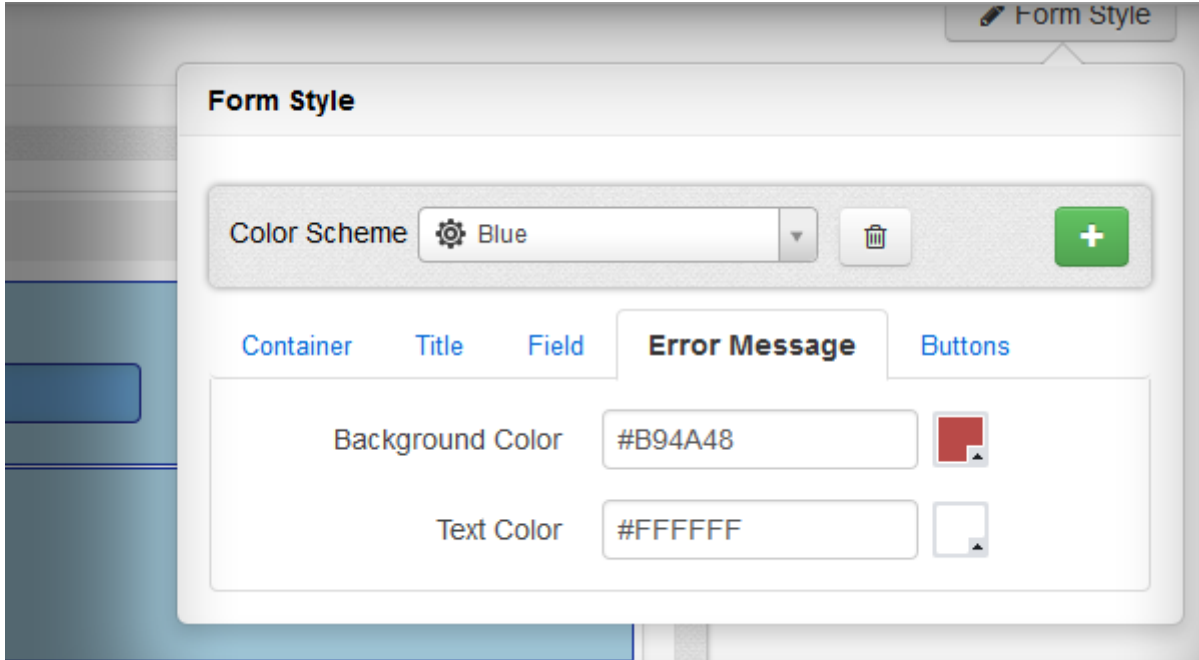

Field

The **Field** tab helps you customize fields which are activated to fill in - with the attributes background color, border color, shadow color, text color. Below are the detailed features of each attribute that you can edit for your form:

- **Background Color:** An attribute which allows you to change the background color for fields in your form.
- **Border Color:** An attribute which allows you to change the border color for fields in your form.
- **Shadow Color:** An attribute which allows you change the shadow color for fields in your form.
- **Text color:** An attribute which allows you change the text color for fields in your form.

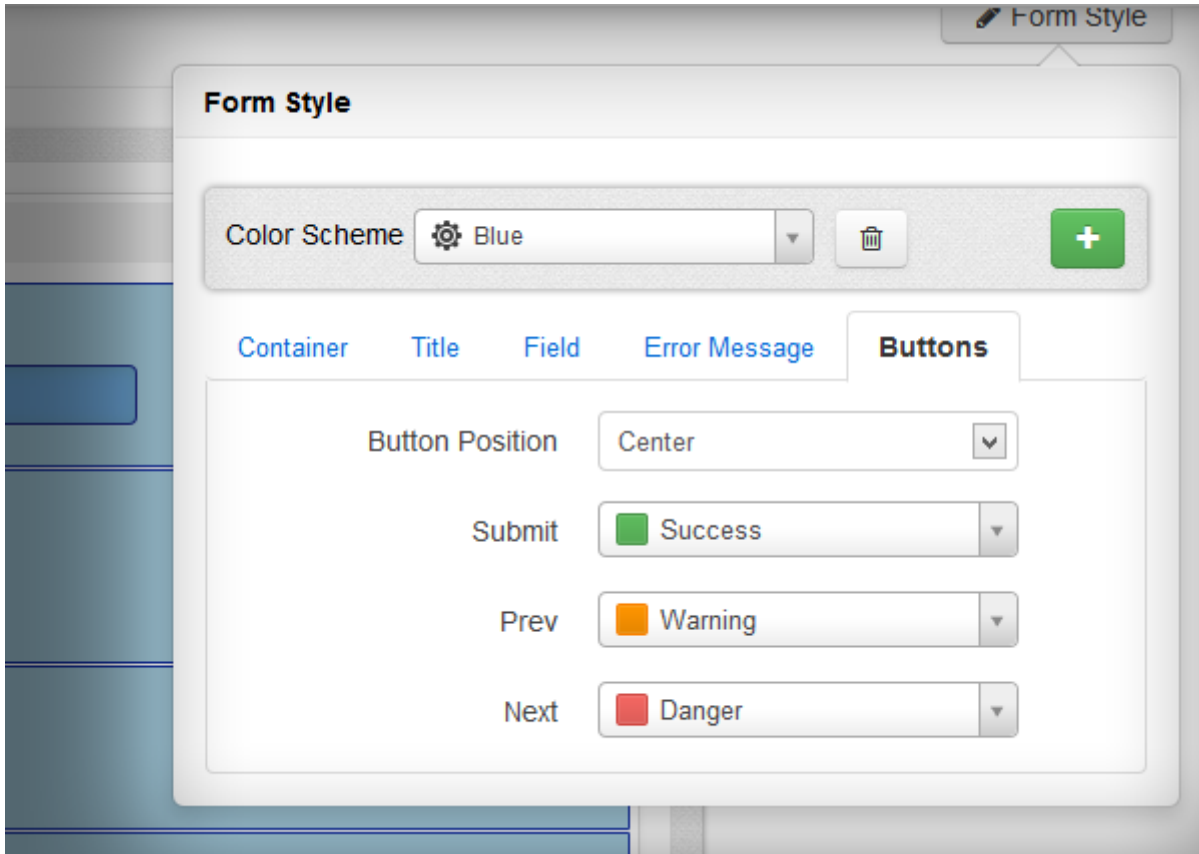

Error Message

The **Error Message tab** helps you change the style for error messages, with the attributes background color and text color. Below are the detailed features of each attribute:

- **Background Color:** This is an attribute which allows you to change the background color for error messages in your form.
- **Text Color:** This is an attribute which allows you to change the text color for error messages in your form.

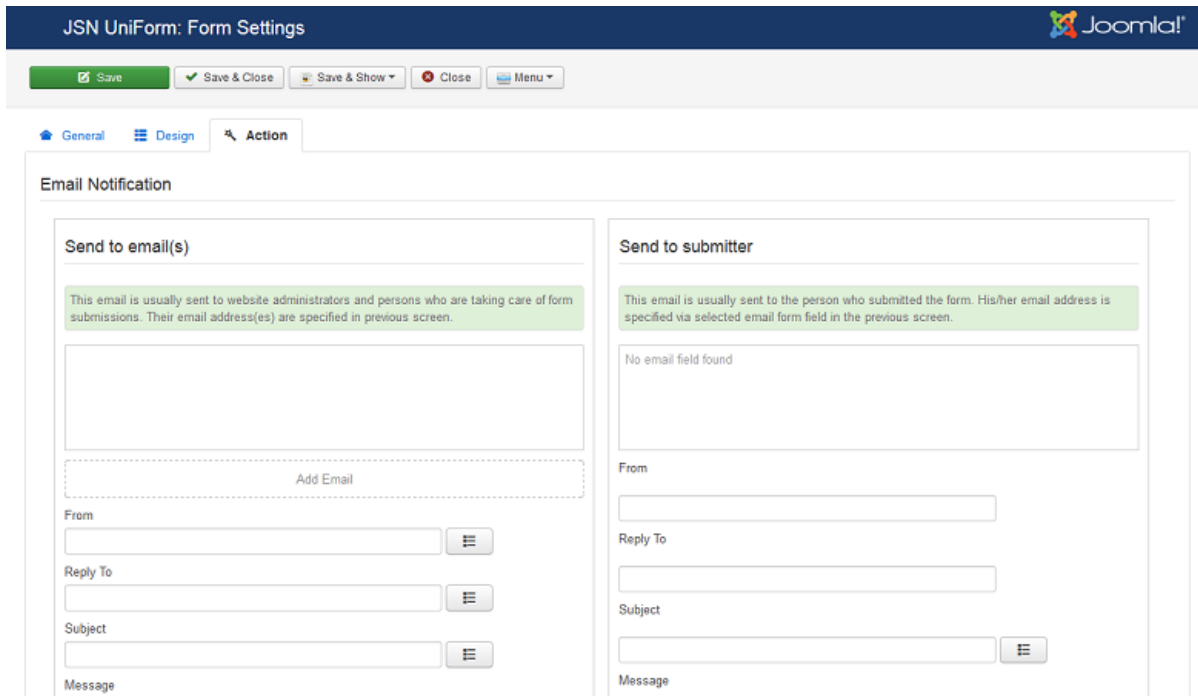

Buttons

The **Buttons** tab helps you change the color and position of the Submit, Prev and Next buttons in your form:

- **Button position:** Allows you to change the position of the button: Center, Left or Right.
- **Submit:** Allows you to change the color of the Submit button.
- **Prev:** Allows you to change the color of the Prev button.
- **Next:** Allows you to change the color of the Next button.

Form action

In this section, you can set up **Email Notification**, **Post Submission Action** and **MailChimp Setting**.

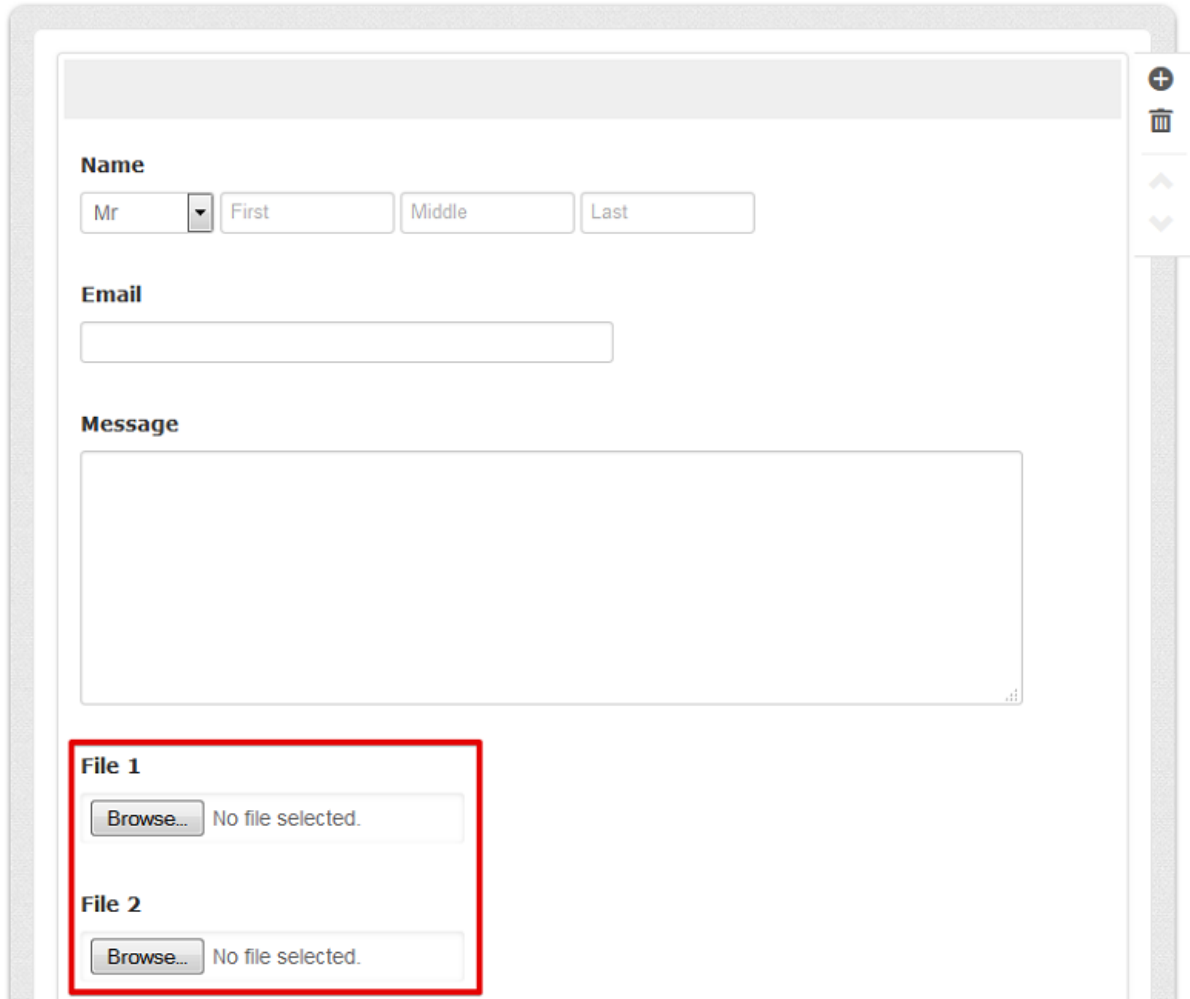

Email Notification

- **Send to email(s):** You can add email addresses to receive email notifications whenever a form is submitted to your website. To set up the email content, you click the button .
- **Send to submitter:** An email will be sent to submitters to inform them about successful submission. To set up the email content, you click the button .

Note:

Within these emails, you can attach files which submitters uploaded in form. To do it:

- In the tab **Design**, you add the field(s) **File Upload**:

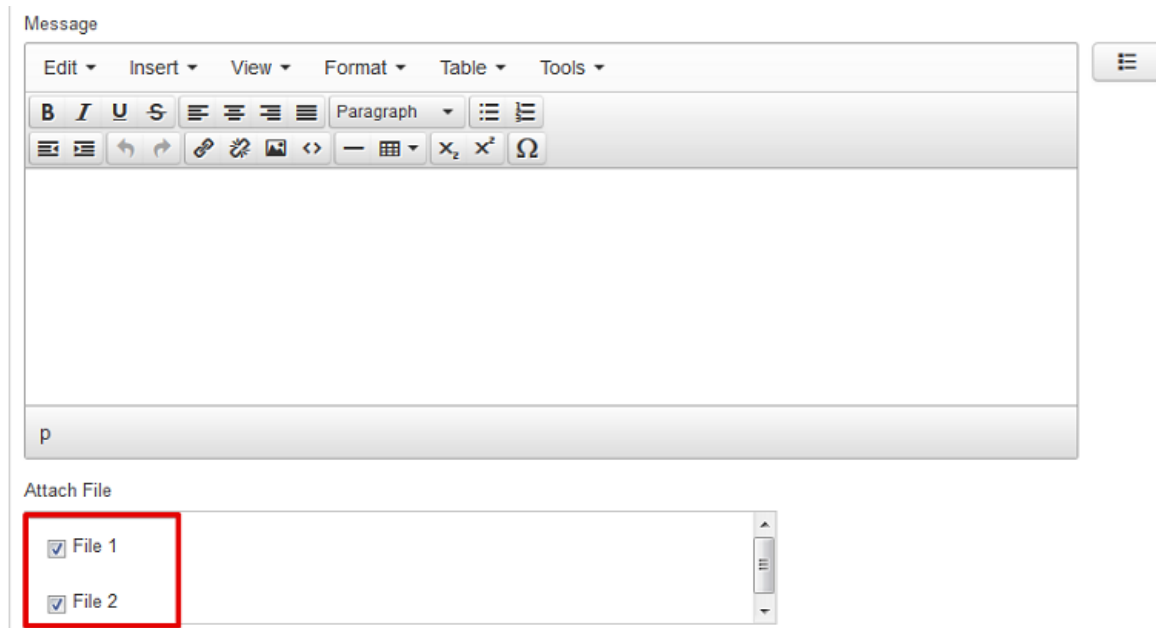

The screenshot displays the JSN UniForm configuration interface. The form layout includes the following fields:

- Name:** A group of four input fields labeled "Mr", "First", "Middle", and "Last". The "Mr" field is a dropdown menu.
- Email:** A single text input field.
- Message:** A large text area for a message.
- File Upload:** Two file upload fields, labeled "File 1" and "File 2". Each field contains a "Browse..." button and the text "No file selected.". This section is highlighted with a red rectangular border.

On the right side of the form, there is a vertical toolbar with icons for adding (+), deleting (trash), and navigating (up/down arrows).

- Then in the tab **Action**, under **Email Notification**, you can choose these fields to be included as attached files.

The screenshot shows the Joomla! JSN UniForm configuration interface. The top section is titled 'Message' and contains a rich text editor with a menu bar (Edit, Insert, View, Format, Table, Tools) and a toolbar with various formatting options. Below the editor is a text area containing the letter 'p'. The bottom section is titled 'Attach File' and contains a list of files with checkboxes. 'File 1' and 'File 2' are both checked, and this section is highlighted with a red rectangle.

Attach files uploaded

Post Submission Action:

- **After form submission:** Here you can set up the action you want submitters to see after submitting their form. It can be **No Action**, **Redirect to URL**, **Redirect to Menu Item**, **Show Article** or **Show Custom Message**.

Post Submission Action

Save Submissions ☐ No ☒ Yes

Do Action

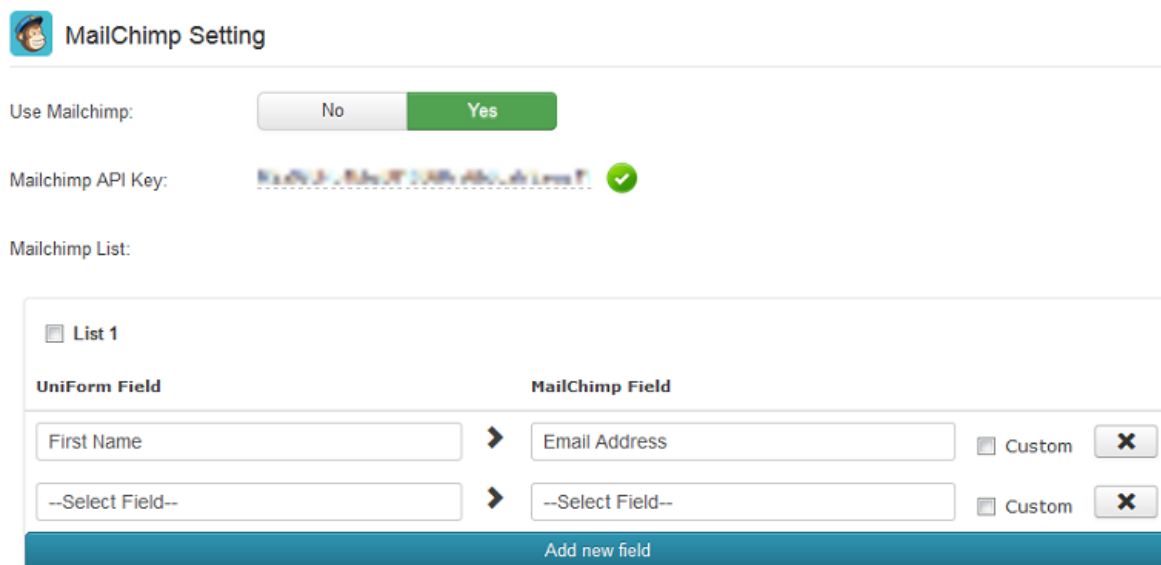

MailChimp Setting

Use Mailchimp: ☒ No ☐ Yes

MailChimp Integration

MailChimp is a simple email marketing software (EMS) which gives you a number of easy options for designing, sending and saving templates of your emails.

Now JSN Uniform has provided an option to let users integrate MailChimp in their forms.

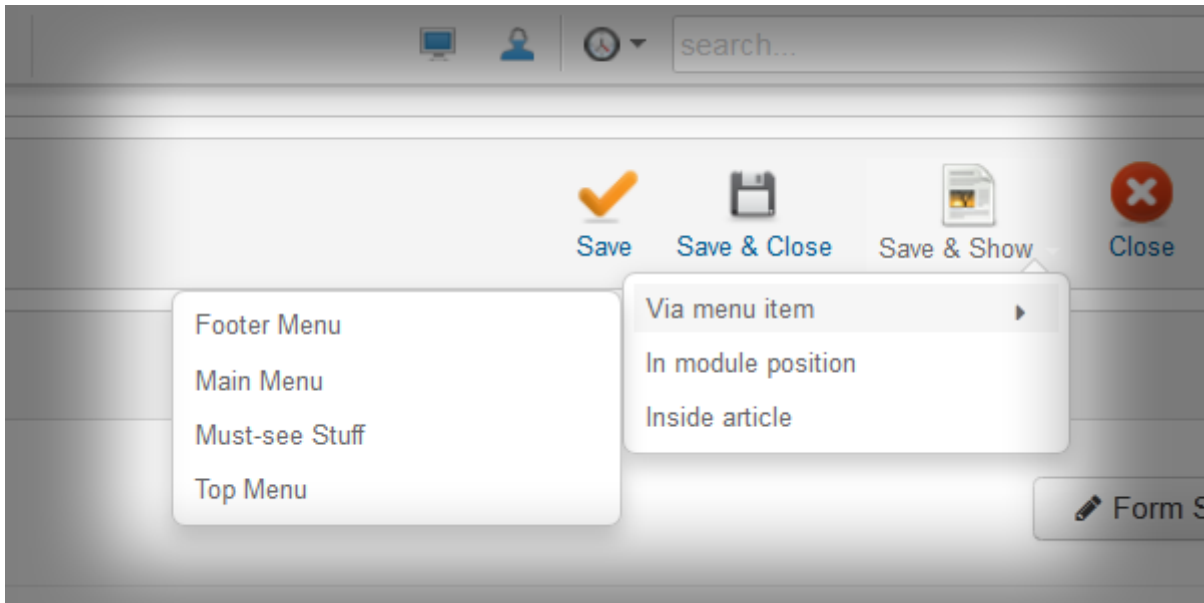

The screenshot shows the 'MailChimp Setting' configuration page. At the top, there's a title 'MailChimp Setting' with a small icon. Below it, the 'Use Mailchimp:' option is set to 'Yes' (indicated by a green button). The 'Mailchimp API Key:' field contains a masked key (represented by dots) and a green checkmark icon, indicating it's valid. The 'Mailchimp List:' section shows a dropdown menu with 'List 1' selected. Below this, there's a table-like structure for mapping fields. The first row maps 'First Name' (under 'UniForm Field') to 'Email Address' (under 'MailChimp Field'). The second row shows '--Select Field--' for both. Each mapping has a 'Custom' checkbox and a delete 'X' button. At the bottom, there's a blue button labeled 'Add new field'.

MailChimp Integration

You can archive a MailChimp API Key by registering an account on mailchimp.com. After filling the API Key, Uniform will automatically retrieve your MailChimp List, the remain thing you need to do is to assign Uniform fields to their related MailChimp field.

Present a form

After setting up your form, you can show it to appear in your website.

In the **Form Settings** page, you click **Save & Show** button to present your form in various ways:

- **Via Menu Item:** You can present your form via any menu items easily.
- **In Module Position:** You can present your form in any module position supported by your template.
- **Inside Article:** You can present your form inside any article.

For example, here is a Job Application form presented in a module position

Job application form in front-end

You can also add top and bottom content when you present a JSN UniForm form module.

Check Submissions

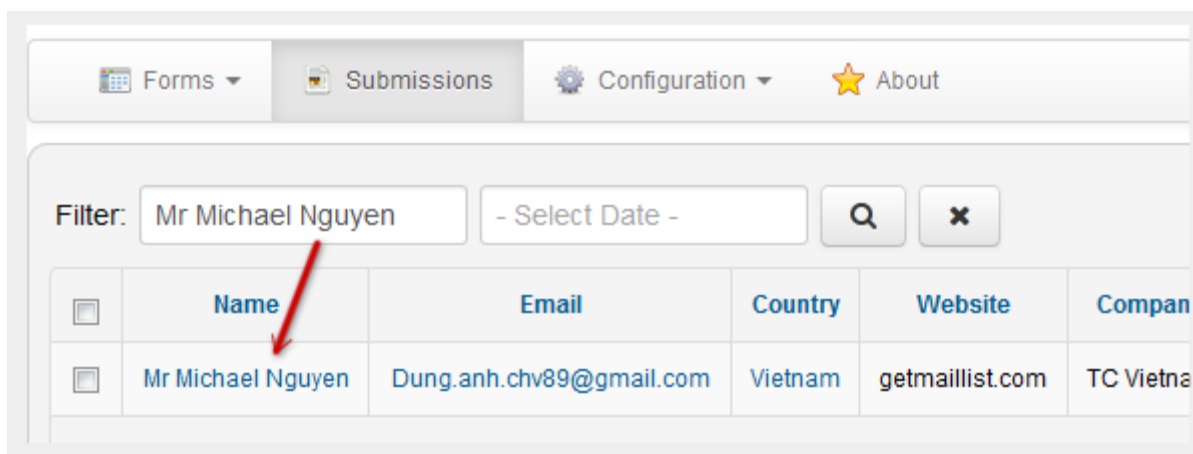

The screenshot shows the Joomla! JSN UniForm interface with the 'Submissions' tab selected. At the top, there are navigation tabs: 'Forms', 'Submissions', 'Configuration', and 'About'. Below the tabs, there is a 'Filter:' section with a text input field, a date selector '- Select Date -', and search buttons with magnifying glass and 'x' icons. The main content area displays a table of submissions with columns for Name, Email, Country, Website, and Company. Each row has a checkbox on the left for selection.

<input type="checkbox"/>	Name	Email	Country	Website	Company
<input type="checkbox"/>	Mr Alonso Xabi	Xabialonso@gmail.com	Andorra	alonso.net.vn	Spain buffalo
<input type="checkbox"/>	Mr Steven Gerrard	Gerrard.steven@gmail.com	France	gerard.vn	Steven
<input type="checkbox"/>	Mr Torres Fernaldo	torres.f@yahoo.com	Spain	footballer.com	Chelsea FC
<input type="checkbox"/>	Mr Michael Nguyen	Dung.anh.chv89@gmail.com	Vietnam	getmaillist.com	TC Vietnam

The **Submission** tab provides you with general information about submissions.

Filter submissions

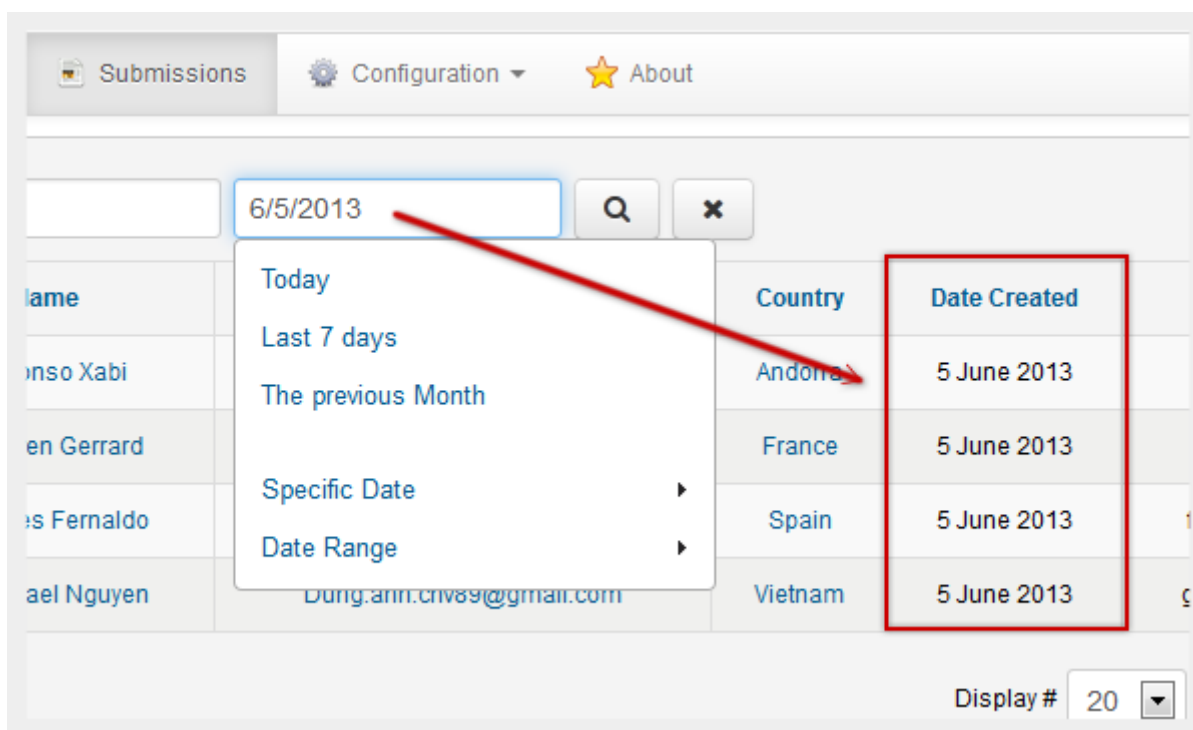

You can filter items with submission information such as Name, Email, etc.

The screenshot shows the 'Submissions' tab in the JSN UniForm interface. At the top, there are navigation links: Forms, Submissions (active), Configuration, and About. Below these, there is a filter section with a text input field containing 'Mr Michael Nguyen', a date dropdown set to '- Select Date -', and search and reset buttons. Below the filter section is a table of submissions. A red arrow points from the 'Name' column header to the first row of the table.

	Name	Email	Country	Website	Company
<input type="checkbox"/>	Mr Michael Nguyen	Dung.anh.chv89@gmail.com	Vietnam	getmaillist.com	TC Vietnam

Otherwise, you can filter submissions by **Date**.

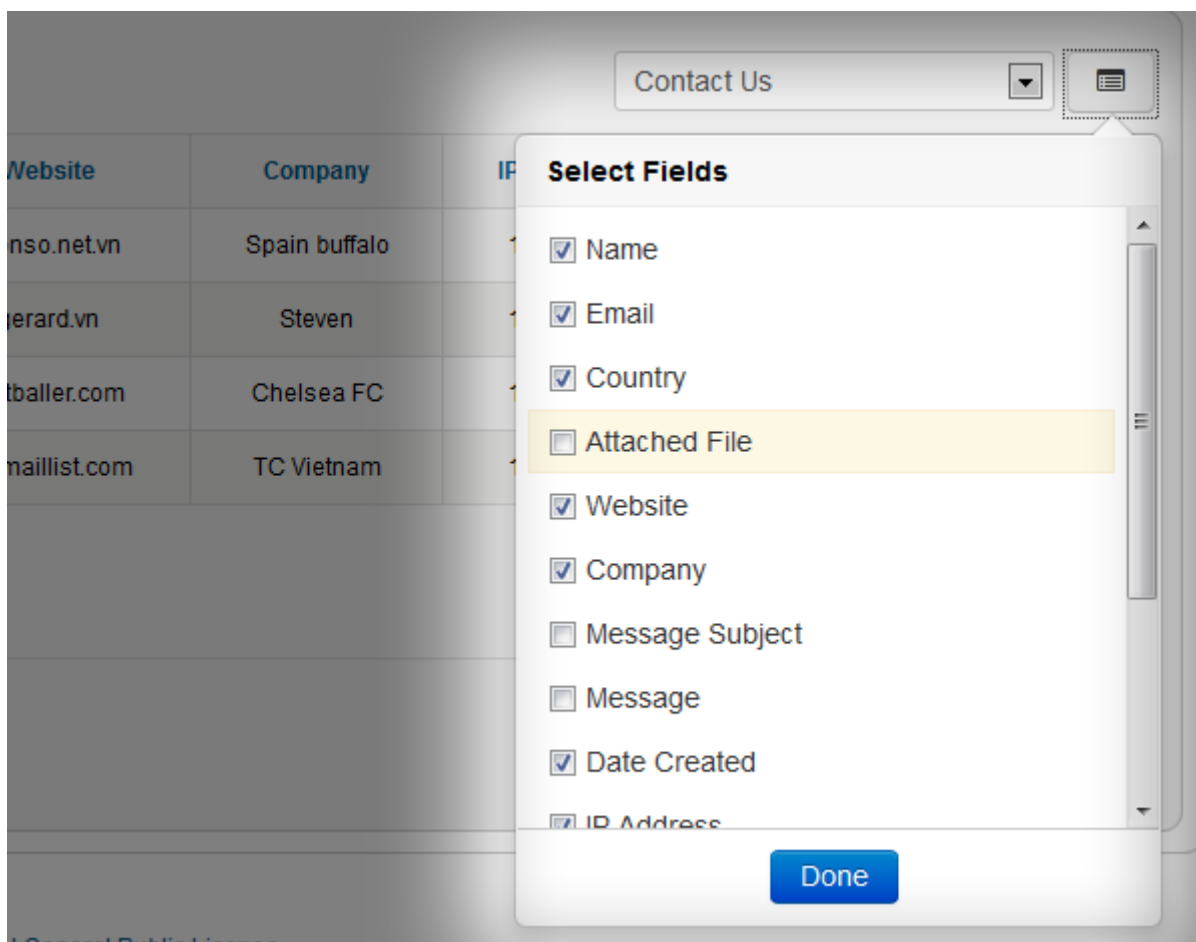

The screenshot shows the 'Submissions' tab in the JSN UniForm interface. The filter section has a date dropdown set to '6/5/2013'. A red arrow points from the date dropdown to a table of submissions. The table has columns for Name, Email, Country, and Date Created. The 'Date Created' column is highlighted with a red box. A red arrow also points from the date dropdown to the 'Date Created' column header.

Name	Email	Country	Date Created
Andreas Xabi		Andorra	5 June 2013
Ben Gerrard		France	5 June 2013
Ismael Fernaldo		Spain	5 June 2013
Michael Nguyen	Dung.anh.chv89@gmail.com	Vietnam	5 June 2013

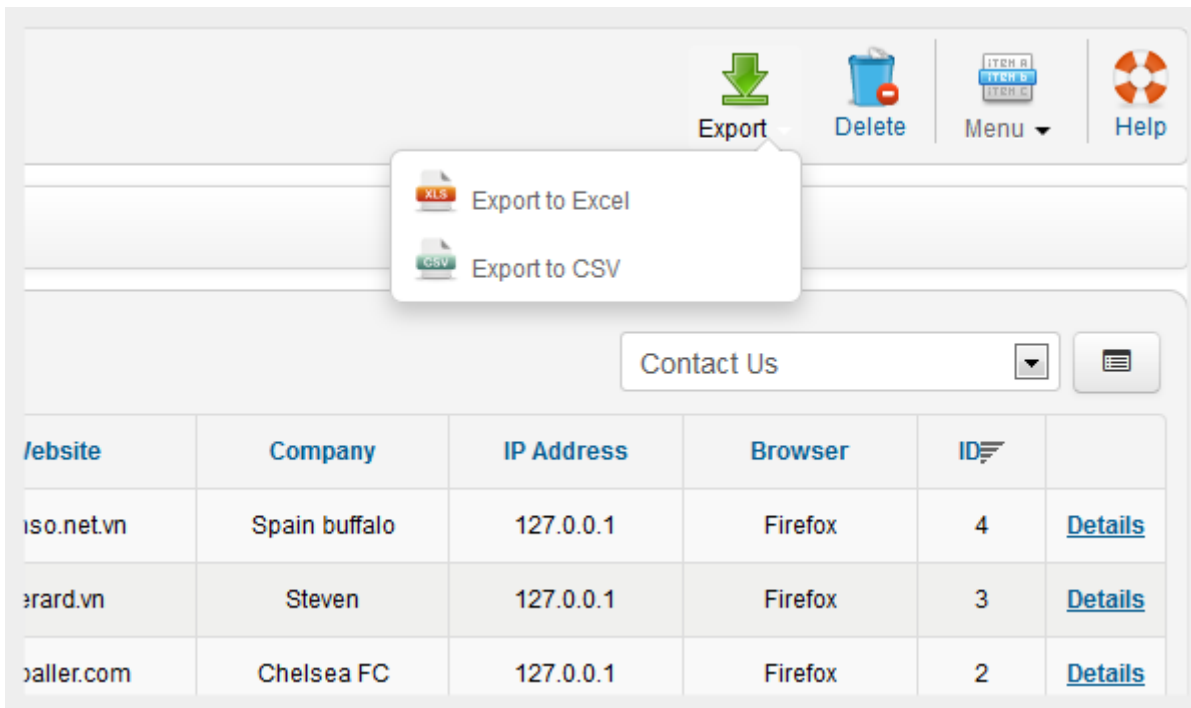

Display # 20

Organize submission fields

You can choose to display important fields in this general submissions page. There are four fields for which you can edit the display order using drag-and-drop function: **Name**, **Email**, **Paragraph Text** and **File Upload**. Other field positions are fixed.

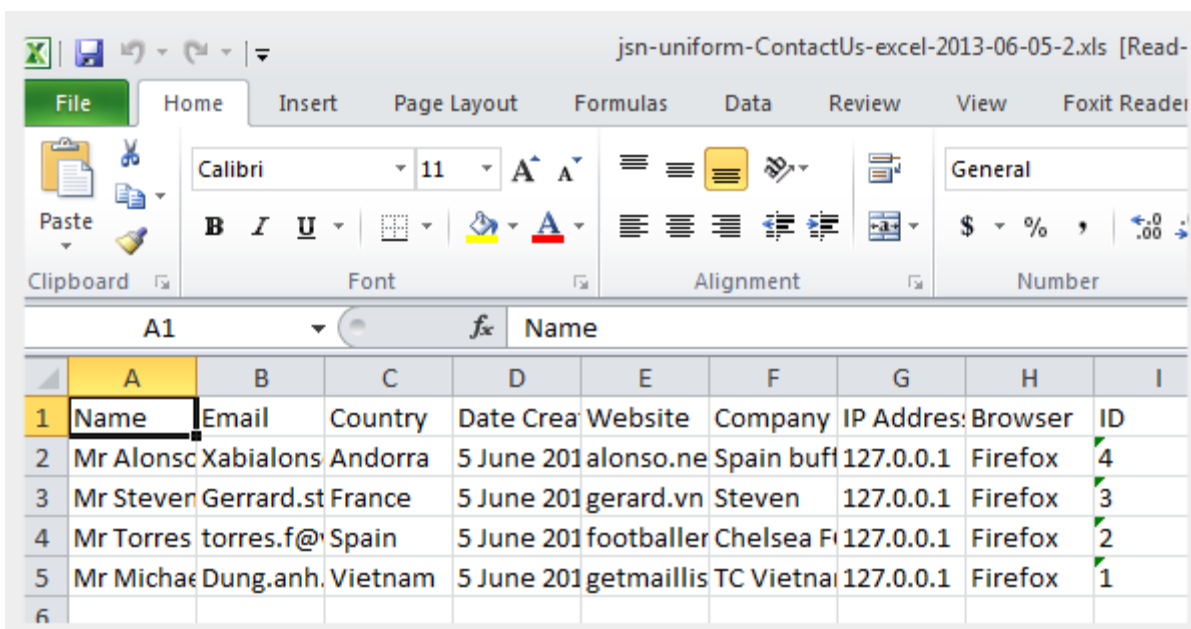

Export submission to Excel + CSV

The screenshot shows the Joomla! JSN UniForm configuration interface. At the top, there are several icons: a green download arrow labeled 'Export', a blue trash can labeled 'Delete', a menu icon labeled 'Menu', and a lifebuoy icon labeled 'Help'. The 'Export' button is highlighted, and a dropdown menu is open, showing two options: 'Export to Excel' (with an XLS icon) and 'Export to CSV' (with a CSV icon). Below the icons, there is a 'Contact Us' button. The main content area displays a table with the following data:

Website	Company	IP Address	Browser	ID	
iso.net.vn	Spain buffalo	127.0.0.1	Firefox	4	Details
erard.vn	Steven	127.0.0.1	Firefox	3	Details
otballer.com	Chelsea FC	127.0.0.1	Firefox	2	Details

You can export all the submissions to Excel or CSV. The exported file has the same content as the **General page of submissions** in the back-end. You can configure what information will be included in the exported file with filter features as well.

The screenshot shows an Excel spreadsheet titled 'jsn-uniform-ContactUs-excel-2013-06-05-2.xls'. The spreadsheet contains the following data:

	A	B	C	D	E	F	G	H	I
1	Name	Email	Country	Date Crea	Website	Company	IP Address	Browser	ID
2	Mr Alonso	Xabialons	Andorra	5 June 201	alonso.ne	Spain buff	127.0.0.1	Firefox	4
3	Mr Steven	Gerrard.st	France	5 June 201	gerard.vn	Steven	127.0.0.1	Firefox	3
4	Mr Torres	torres.f@	Spain	5 June 201	footballer	Chelsea F	127.0.0.1	Firefox	2
5	Mr Michael	Dung.anh.	Vietnam	5 June 201	getmaillis	TC Vietna	127.0.0.1	Firefox	1

Export to Excel

The screenshot shows an Excel spreadsheet with the following data:

	A	B	C	D	E	F	G	H	I
1	Name	Email	Country	Date Crea	Website	Company	IP Address	Browser	ID
2	Mr Alonso	Xabialons	Andorra	5-Jun-13	alonso.ne	Spain buff	127.0.0.1	Firefox

Configuration

The screenshot displays the JSN UniForm Configuration interface. At the top, there is a navigation bar with tabs for 'Forms', 'Submissions', 'Configuration', and 'About'. The 'Configuration' tab is active. On the left side, there is a sidebar menu with two main sections: 'CONFIGURATION' and 'MAINTENANCE'. Under 'CONFIGURATION', there are links for 'Global Parameters' (selected), 'Messages', 'Languages', and 'Product Update'. Under 'MAINTENANCE', there are links for 'Data' and 'Permissions'. The main content area is titled 'GLOBAL PARAMETERS' and contains two sub-sections: 'Form' and 'Optimization'. The 'Form' sub-section is currently selected. It includes a 'General' section with a 'Load Bootstrap CSS' toggle set to 'Yes' and an 'Upload Folder' text input field containing 'images/jsnuniform/'. Below this is a 'Default Form Settings' section with an 'After form submission' dropdown menu set to 'No Action' and a 'Send to email(s)' text area. At the bottom of the 'Send to email(s)' section is a dashed box labeled 'Add Email'. A 'Save' button is located at the bottom right of the configuration area.

In this section you can perform a variety of configuration and maintenance tasks such as data backup/restore, sample data installation, theme management, etc.

Global Parameters

GLOBAL PARAMETERS

Form Optimization

General

Load Bootstrap CSS ☐ No ☒ Yes

Upload Folder

Default Form Settings

After form submission

Send to email(s)

In this section you can configure:

- **Upload folder:** to define where all uploaded file will be stored.
- **After form submission:** to define what action to perform after a user submission.
- **Sent to email(s):** to define what email will be sent in response to each submission.

Messages

#	Message	Screen	Order	Show
<div>Save</div>				

On some JSN UniForm pages, you might see a hint message guiding you how to use the product. These messages can be turned on or off.

Just check/uncheck boxes in column **Show** and click button **Save** to confirm.

Languages

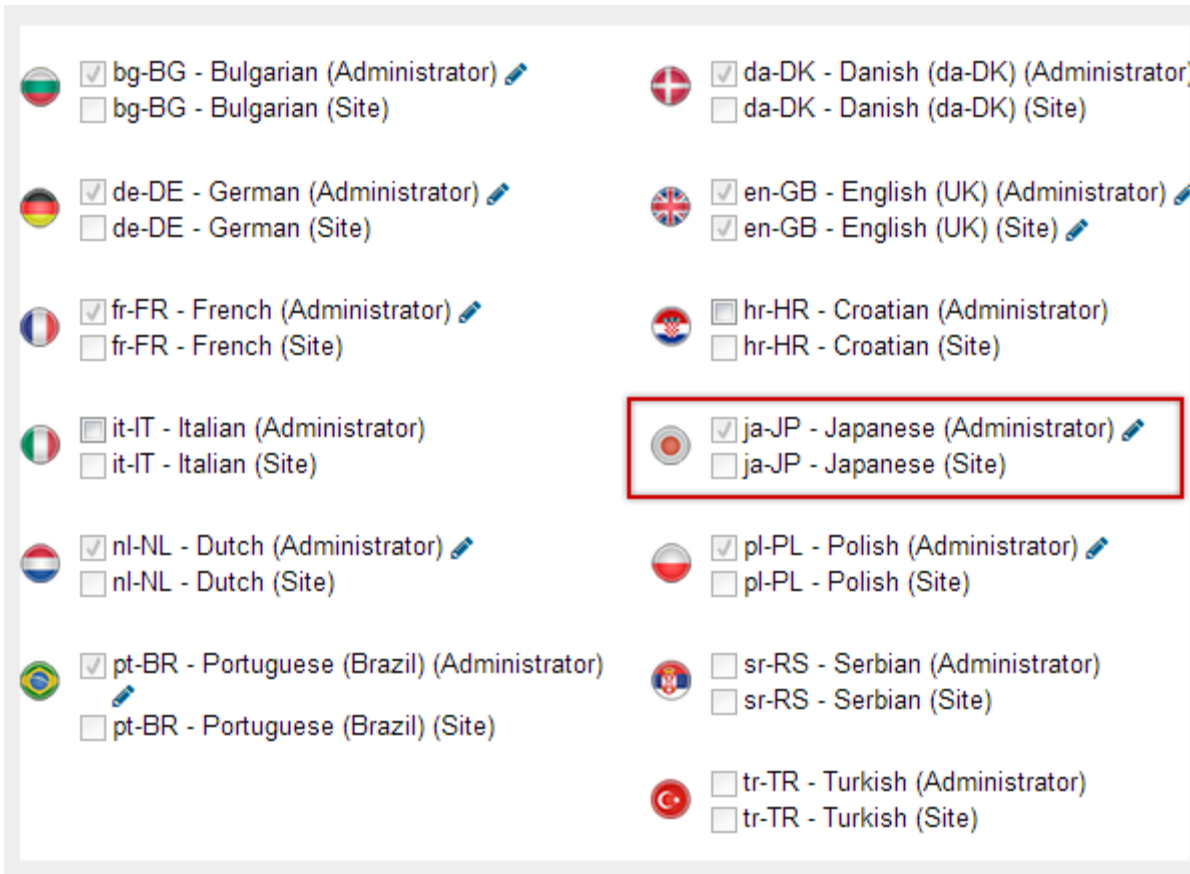

<input checked="" type="checkbox"/> bg-BG - Bulgarian (Administrator) <input type="checkbox"/> bg-BG - Bulgarian (Site)	<input checked="" type="checkbox"/> da-DK - Danish (da-DK) (Administrator) <input type="checkbox"/> da-DK - Danish (da-DK) (Site)
<input checked="" type="checkbox"/> de-DE - German (Administrator) <input type="checkbox"/> de-DE - German (Site)	<input checked="" type="checkbox"/> en-GB - English (UK) (Administrator) <input checked="" type="checkbox"/> en-GB - English (UK) (Site)
<input checked="" type="checkbox"/> fr-FR - French (Administrator) <input type="checkbox"/> fr-FR - French (Site)	<input type="checkbox"/> hr-HR - Croatian (Administrator) <input type="checkbox"/> hr-HR - Croatian (Site)
<input type="checkbox"/> it-IT - Italian (Administrator) <input type="checkbox"/> it-IT - Italian (Site)	<input checked="" type="checkbox"/> ja-JP - Japanese (Administrator) <input type="checkbox"/> ja-JP - Japanese (Site)

<input checked="" type="checkbox"/> pt-BR - Portuguese (Brazil) (Administrator) <input type="checkbox"/> pt-BR - Portuguese (Brazil) (Site)	<input type="checkbox"/> sr-RS - Serbian (Administrator) <input type="checkbox"/> sr-RS - Serbian (Site)
	<input type="checkbox"/> tr-TR - Turkish (Administrator) <input type="checkbox"/> tr-TR - Turkish (Site)

Currently JSN UniForm supports **13 primary languages**. If you haven't seen your language supported, please [drop us a line in "General inquires" section](#) to join our Translation Team.

Languages management

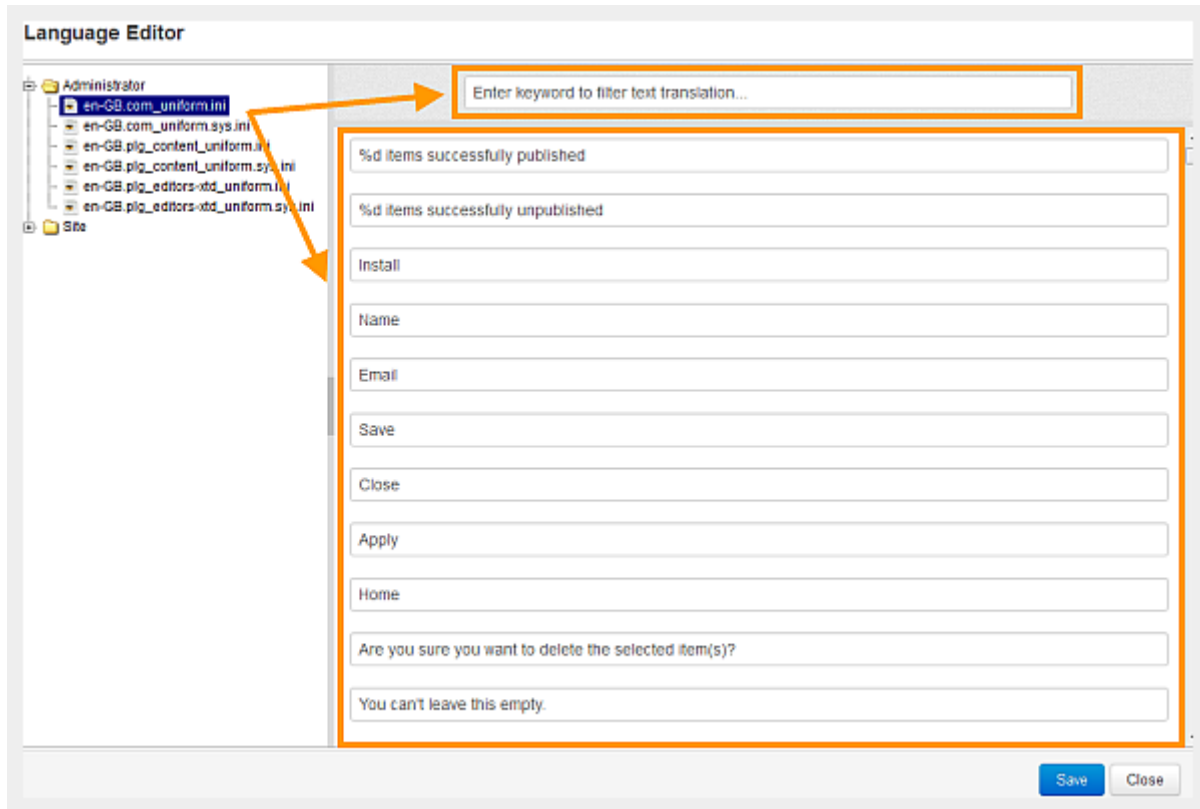

You can edit the language used by JSN UniForm in both the front-end and back-end. It means that you can translate language files and apply them yourself.

To use this function, you go to the **Languages** page of JSN UniForm -> click  to edit the language files.

<input checked="" type="checkbox"/>  bg-BG - Bulgarian (Administrator) 	<input checked="" type="checkbox"/>  da-DK - Danish (da-DK) (Administrator) 
<input type="checkbox"/> bg-BG - Bulgarian (Site)	<input type="checkbox"/> da-DK - Danish (da-DK) (Site)
<input checked="" type="checkbox"/>  de-DE - German (Administrator) 	<input checked="" type="checkbox"/>  en-GB - English (UK) (Administrator) 
<input type="checkbox"/> de-DE - German (Site)	<input checked="" type="checkbox"/> en-GB - English (UK) (Site) 
<input checked="" type="checkbox"/>  fr-FR - French (Administrator) 	<input type="checkbox"/>  hr-HR - Croatian (Administrator)
<input type="checkbox"/> fr-FR - French (Site)	<input type="checkbox"/> hr-HR - Croatian (Site)
<input type="checkbox"/>  it-IT - Italian (Administrator)	<input checked="" type="checkbox"/>  ja-JP - Japanese (Administrator) 
<input type="checkbox"/> it-IT - Italian (Site)	<input type="checkbox"/> ja-JP - Japanese (Site)
<input checked="" type="checkbox"/>  nl-NL - Dutch (Administrator) 	<input checked="" type="checkbox"/>  pl-PL - Polish (Administrator) 
<input type="checkbox"/> nl-NL - Dutch (Site)	<input type="checkbox"/> pl-PL - Polish (Site)
<input checked="" type="checkbox"/>  pt-BR - Portuguese (Brazil) (Administrator) 	<input type="checkbox"/>  sr-RS - Serbian (Administrator)
<input type="checkbox"/> pt-BR - Portuguese (Brazil) (Site)	<input type="checkbox"/> sr-RS - Serbian (Site)
	<input type="checkbox"/>  tr-TR - Turkish (Administrator)
	<input type="checkbox"/> tr-TR - Turkish (Site)

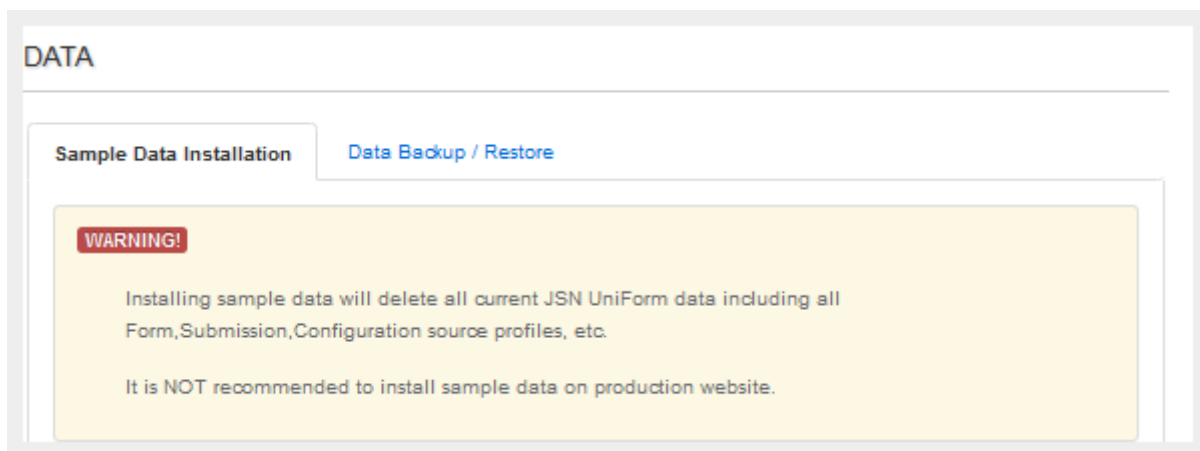

Then, you can edit all the strings in the language files here. Here, you also can search for keywords to filter the translation.

To finish, you click **Save** and **Close** to apply your changes.

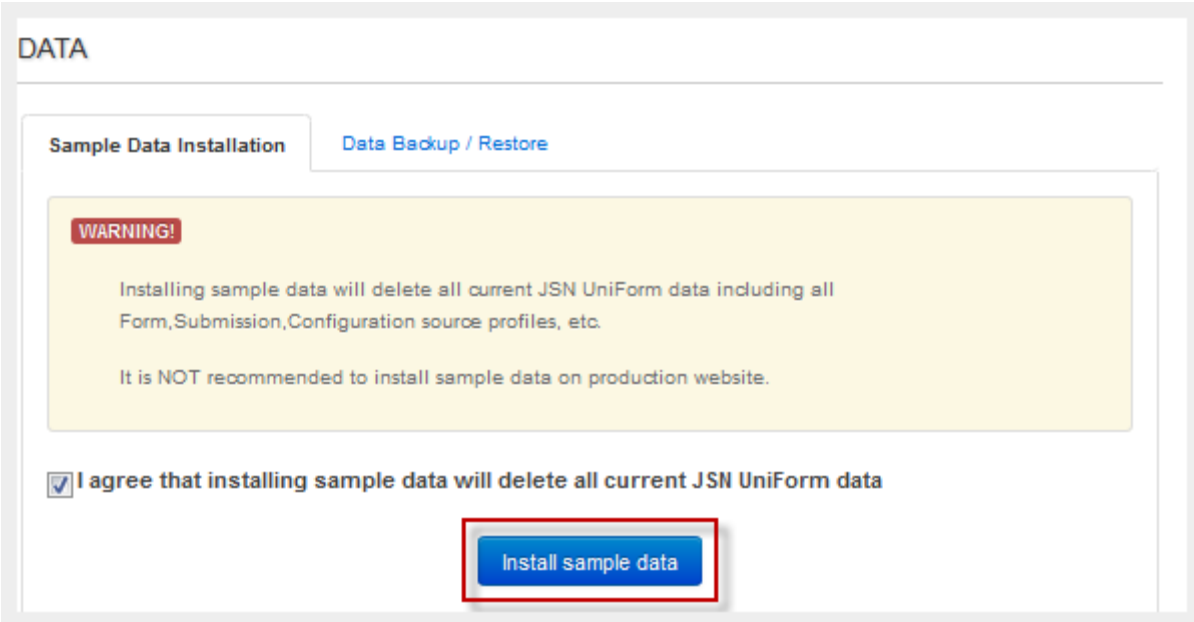

Please note that you can edit the language that you are installing on your site only.

Data

In this section, you can manage data in your website.

Sample Data Installation

DATA

Sample Data Installation Data Backup / Restore

WARNING!

Installing sample data will delete all current JSN UniForm data including all Form, Submission, Configuration source profiles, etc.

It is NOT recommended to install sample data on production website.

☒ I agree that installing sample data will delete all current JSN UniForm data

Install sample data

Sample Data Installation is the perfect choice for users who are new to JSN UniForm. By installing sample data, you will have predefined forms, so you can start using the product right away. Just by following simple on-screen instructions to install the sample data.

Data Backup / Restore

The screenshot shows a web interface titled "DATA" with two tabs: "Sample Data Installation" and "Data Backup / Restore". The "Data Backup / Restore" tab is active. It contains two sections: "Data Backup" and "Data Restore".

Data Backup Section:

- Backup Filename:** A text input field.
- ☐ Attach timestamp to the filename
- Backup Options:**
 - ☐ Database
 - ☒ Backup folder attach file
- Backup:** A blue button.

Data Restore Section:

- Backup File:** A text input field with a "Browse" button to its right.
- Restore:** A blue button.

The Data Backup / Restore function was built to keep your data safe. This is especially useful, when you are migrating a website or upgrading to a new version of Joomla!. Keep in mind that this backup / restore feature covers only JSN UniForm data, and not the entire website data.

Paypal Integration

From version 3.1.6, JSN Uniform is updated with a new feature to support Paypal payment. Now with the **Submit** button, you can direct users to Paypal payment gateway integrated in JSN Uniform where they can make the purchase for the items chosen in the form with their own Paypal accounts.

Apart from Sandbox API, you can bring your Paypal application into production by requesting **Live API credentials**.

To receive your Live API credentials, please follow these steps:

1. Go to your Paypal account at www.paypal.com

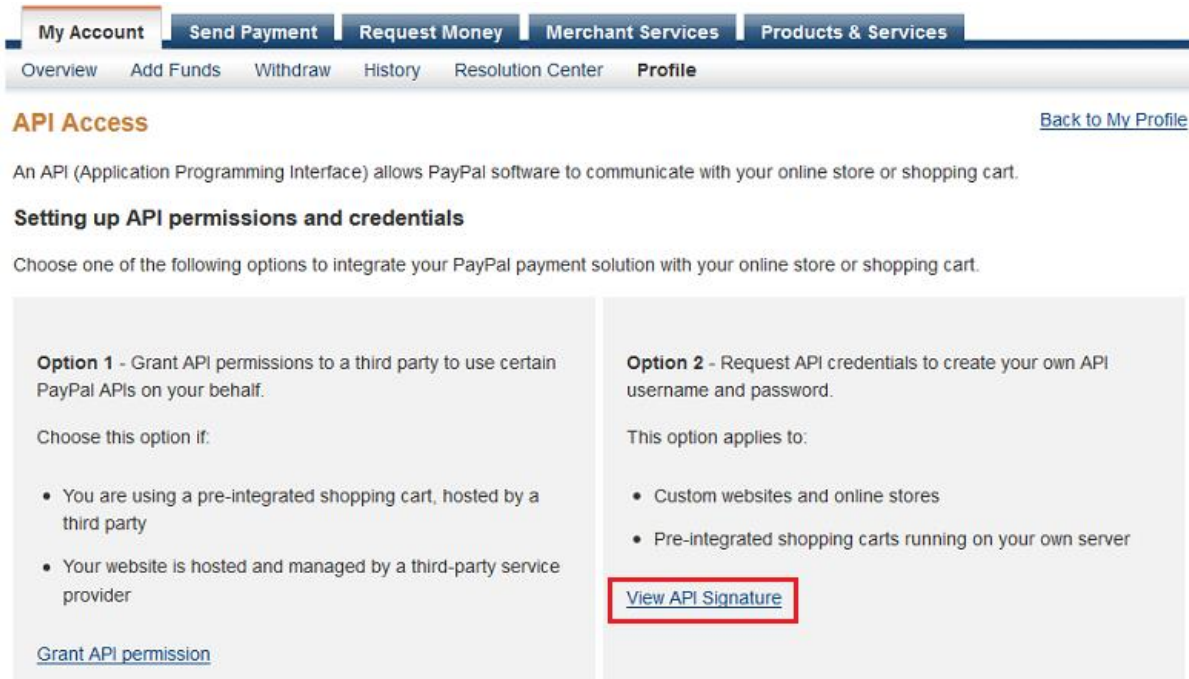

2. Access your **Profile** and enter **My selling tools** section

In this section, you can see the field **API access** section, choose Update to proceed to the next page.

3. In **API access** page, click **View API Signature** in Option 2

API Access [Back to My Profile](#)

An API (Application Programming Interface) allows PayPal software to communicate with your online store or shopping cart.

Setting up API permissions and credentials

Choose one of the following options to integrate your PayPal payment solution with your online store or shopping cart.

Option 1 - Grant API permissions to a third party to use certain PayPal APIs on your behalf.

Choose this option if:

- You are using a pre-integrated shopping cart, hosted by a third party
- Your website is hosted and managed by a third-party service provider

[Grant API permission](#)

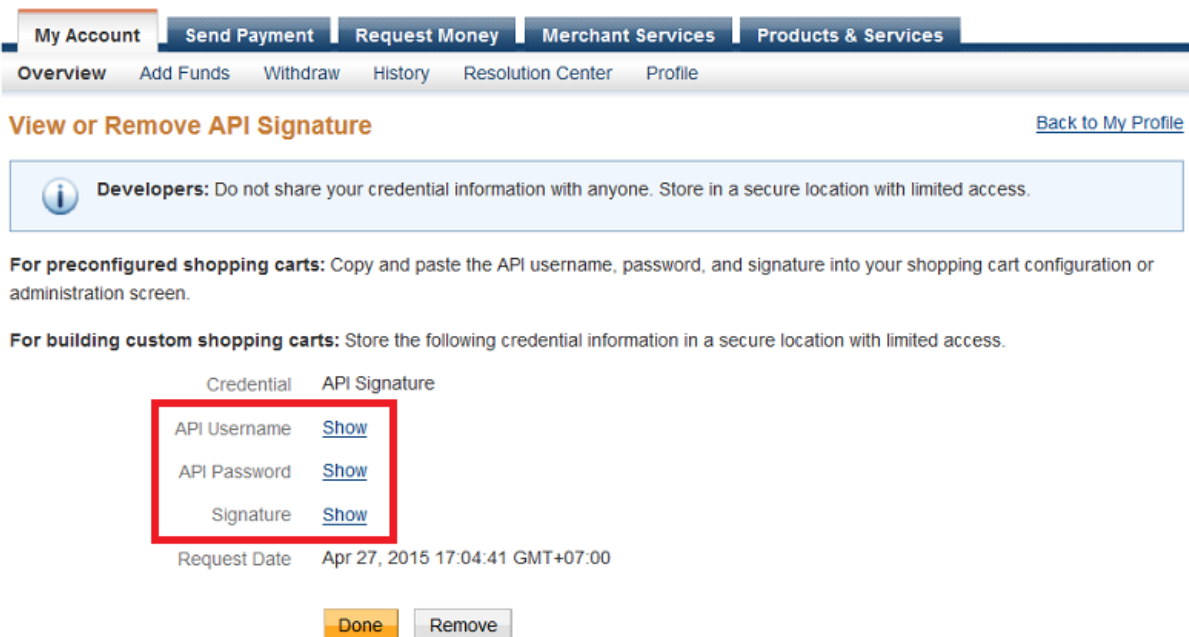

Option 2 - Request API credentials to create your own API username and password.

This option applies to:

- Custom websites and online stores
- Pre-integrated shopping carts running on your own server

[View API Signature](#)

4. In the next page, API information can be revealed by clicking **Show** buttons:

View or Remove API Signature [Back to My Profile](#)

Developers: Do not share your credential information with anyone. Store in a secure location with limited access.

For preconfigured shopping carts: Copy and paste the API username, password, and signature into your shopping cart configuration or administration screen.

For building custom shopping carts: Store the following credential information in a secure location with limited access.

Currently Paypal has support for 22 Currencies, you can freely choose one of them to assign for the Uniform with position option among **Left** , **Right** , **Left with space** , **Right with space**.

Set up form with Payment Integration

Creating a form with Paypal integration is quite simple and fast in JSN Uniform.

Enable Payment Integration

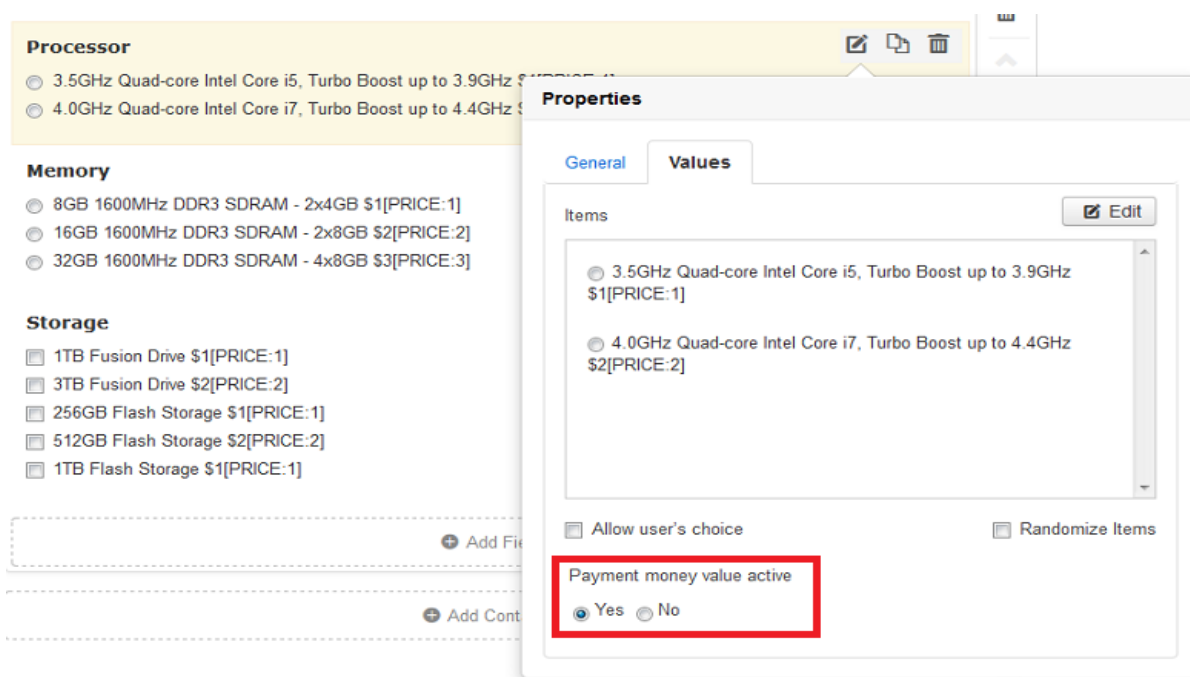

First of all, in tab **General**, Payment Integration should be set to **Paypal**.

The screenshot shows the 'General' tab of the JSN UniForm configuration interface. It is divided into 'Details' and 'Options' sections. In the 'Details' section, the 'Title' is 'Paypal form', the 'Description' is empty, and the 'Status' is 'Published'. In the 'Options' section, 'Allow Front-end Submission Editing' is set to 'No', 'Captcha Integration' is 'No Captcha', and 'Payment Integration' is 'PayPal', which is highlighted with a red rectangle.

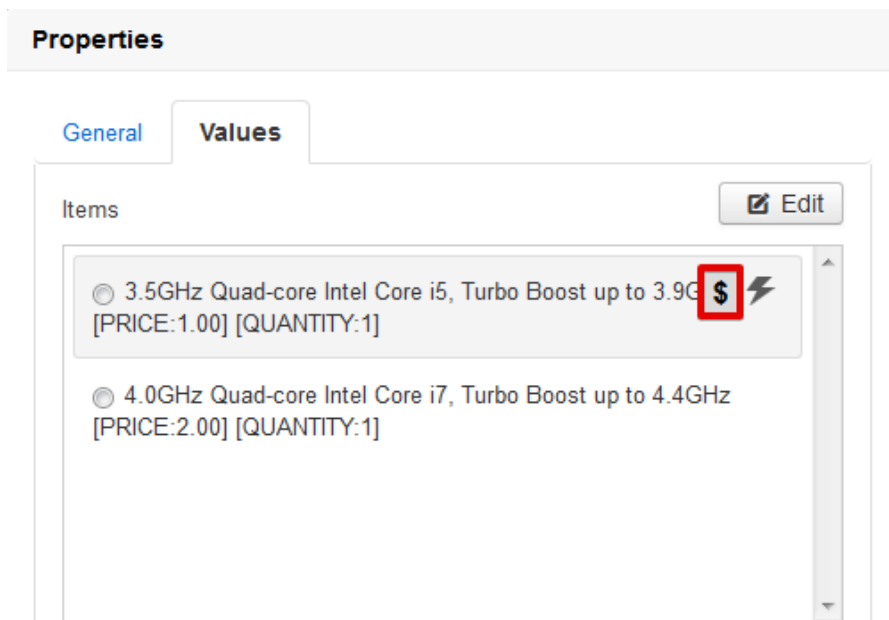

Define form fields with Payment money value active

In tab **Design**, you can add/edit form fields normally, except for some fields those have an extra option **Payment money value active**. Setting this option to **Yes** will include the field item and its money value to Paypal submission.

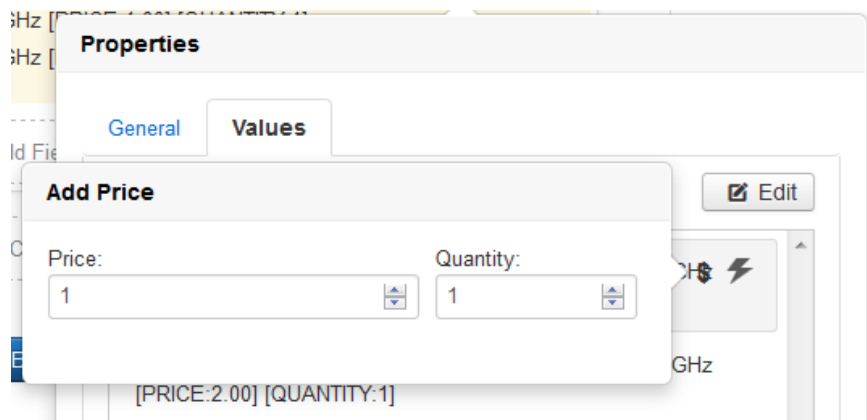

The screenshot shows the 'Design' tab of the JSN UniForm configuration interface. It displays a form field with a list of items. The 'Properties' dialog box is open, showing the 'Values' tab. The 'Items' list contains two items: '3.5GHz Quad-core Intel Core i5, Turbo Boost up to 3.9GHz \$1[PRICE:1]' and '4.0GHz Quad-core Intel Core i7, Turbo Boost up to 4.4GHz \$2[PRICE:2]'. The 'Payment money value active' option is checked, and the 'Yes' radio button is selected, which is highlighted with a red rectangle.

For example with the Multi-Choice field **Processor** in the picture, Payment money value is active. In each item line there are additional parameters **[PRICE:{value1}]** and **[QUANTITY:{value2}]** which defines the money value and quantity for the related item in the list. You can open a dialog to define these parameters for each item by clicking on the button \$ appearing when you hover over that item's name:

Value item list

Money and quantity parameters

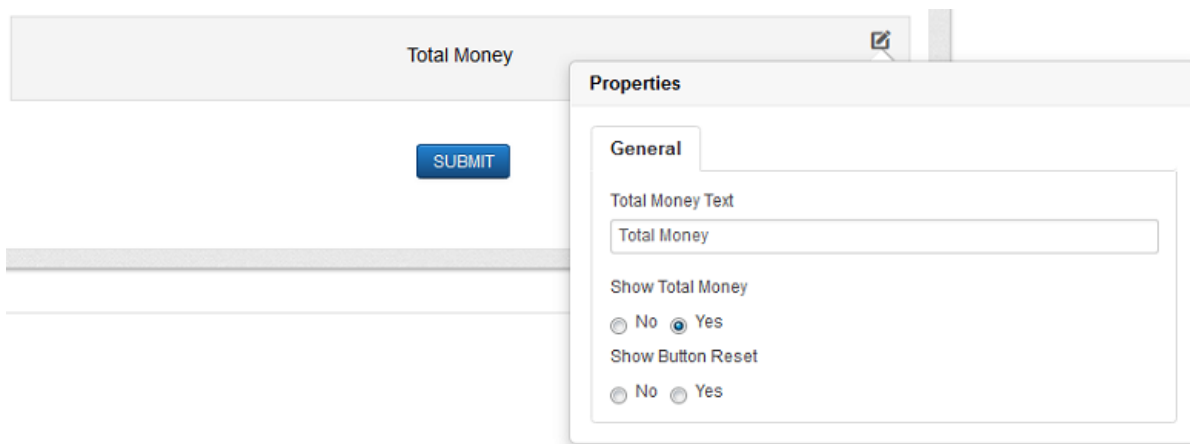

These parameters will not be shown in frontend but Uniform will use their values to calculate the payment displayed in Paypal gateway.

Your order summary

Descriptions	Amount
Processor:4.0GHz Quad-core Intel Co... Item description: Processor:4.0GHz Q... Item number: 1 Item price: \$2.00 Quantity: 1	\$2.00

Download Demo Support Documentation

Got headache with those complicated form solutions out there? Let the better alternative - JSN UniForm take charge of simplifying your workflow.

Easy-to-use but still sophisticated and functional, JSN UniForm will help you to generate and manage various forms in your site without a single line of code. "Contact us", "Survey" and "Job application" are just some of hundreds of forms that this single extension can help you to create and control.

JSN UniForm PRO comes with HOT features:

- * Wide variety of form fields
- * Drag and Drop feature saves much time of form management.
- * Multiple pages form allows you to arrange form fields in logical pages.

Steps to vote for an extension on JED

1. Log in your account on JED. If you haven't got one yet, you can sign up for free or log in with your Facebook account.
2. Go to the extension page on JED, click the "submit review" button and write down your thoughts.

Please note that your review will be checked by the Editor team before being published.

[For newbies] Download free e-books to build Joomla! websites

Free E-books, written by JoomlaShine Team

Building a Joomla website is a challenge with a lot of Joomla! newbies. To help you do this task more easily and quickly, JoomlaShine team released the FREE e-book: **Joomla! 3.x Made Easy**. You know, you can get useful manuals about Joomla! 3.x in 3 languages: English, German or Danish.

Both of them include 6 chapters as following:

- Get to know about Joomla! CMS
- Install Joomla! on local host
- Create content for your site
- Customize website appearance with a Joomla! template
- Arrange modules in positions
- Expand your website functionality with Joomla! extension
